Unit 9 Early Explorations of North America

Activity Book

This Activity Book contains activity pages that accompany the lessons from the Unit 9 Teacher Guide. The activity pages are organized and numbered according to the lesson number and the order in which they are used within the lesson. For example, if there are two activity pages for Lesson 4, the first will be numbered 4.1 and the second 4.2. The Activity Book is a student component, which means each student should have an Activity Book.

TAKE-HOME

Caregiver Letter

Dear Caregiver,

Please help your student succeed in spelling by taking a few minutes each evening to review the words with them. Helpful activities for your student to do include spelling the words orally, writing sentences using the words, and simply copying the words.

Spelling Words

This week we are reviewing the spelling patterns we've learned for /ue/ (spelled u, u_e, and ue).

Students have been assigned two Challenge Words, *impossible* and *journal*. Challenge Words are words used very often. The Challenge Words do not follow the spelling patterns for this week and need to be memorized.

The Content Word for this week is *explorer*. This word is directly related to the material that we are reading in *The Age of Exploration*. The Content Word is an optional spelling word for your student. If your student would like to try it, but gets it incorrect, it will not count against them on the assessment. We encourage students to stretch themselves a bit and try to spell this word.

1. hue	8. rescue	15. uniform
2. perfume	9. issue	16. confuse
3. unify	10. cubical	17. fuming
4. continue	11. useful	18. mute
5. argue	12. utensils	Challenge Word: impossible
6. amusement	13. bugle	Challenge Word: journal
7. accuse	14. occupy	Content Word: explorer

Student Reader

The chapters your student will read in *The Age of Exploration* include information about explorers from Europe. These selections are historical accounts of the difficulties explorers faced, what they were in search of, their destinations, and, often, their discoveries. This week students will read about the quest for spices and gold, about navigational tools, and about a settlement built by the Spanish. Be sure to ask your student each evening about what they are learning.

Below are some suggestions for activities that you may do at home to highlight what your student is learning about the European explorers of North America.

1. The Transatlantic Journey: Geography

On a world map or globe, have your student locate Asia, Europe, North America, and the Atlantic Ocean. Once your student shows they can identify these larger geographic areas, ask your student to locate Spain, Italy, and England in Europe; India in Asia; and the Bahamas and other islands in the Caribbean Sea. Ask your student who Christopher Columbus was, in which country he was born, and who funded his expedition. Ask why Christopher

1.3 CONTINUED

TAKE-HOME

Columbus thought he would find the East Indies if he sailed west across the Atlantic Ocean. Ask your student what motivated kings and queens to sponsor transatlantic voyages, and what motivated explorers to make uncharted journeys to the "New World."

2. Discussion Topics

DATE:

Ask your student, "If you were an explorer, where in the world would you want to explore?" Have your student pick a place on the globe. Ask your student to envision what life must have been like there five hundred years ago, without electricity, indoor plumbing, central heating or cooling, advanced medical care, air travel, etc. Ask the following questions: "How would you prepare for the journey? What would you have to bring? How would you get to your destination? What kinds of jobs would people accompanying you on the journey have to be able to do to make the journey possible?" Ask your student how they would feel about arriving in an unfamiliar land with a foreign landscape, seeing unfamiliar people who look different from those in his/her culture, and who speak an unfamiliar language. Ask, "How would you survive in the new land? How would you communicate with the inhabitants? How would you figure out where to go in an uncharted land? How would you feed yourself? Would you stay and make a new home, or try to find a way back where you came from?" Now ask your student to imagine that they were a Native American seeing Europeans arrive in their homeland. Ask, "What would you think? How would you feel? How would you decide whether or not to become friends with the newcomers?"

3. Words to Use

Below is a list of some of the words that your student will be learning about and using. Try to use these words in everyday speech with your student if possible. Otherwise make up sentences that use these words.

- *propose*—I propose we order out for dinner tonight instead of cooking.
- *conquistadors*—The Spanish conquistadors were more interested in finding gold in the New World than they were in the possibility of creating Spanish settlements.
- *colonization*—The British colonization of the New World resulted in the original thirteen colonies.
- *disastrous*—Oil spills and other types of human pollution have disastrous effects on ecosystems in the affected areas and far beyond.
- *investigative*—The scientist's investigative research helped solve the mystery behind the existence of microscopic organisms called bacteria.

4. Read Aloud Each Day

It is very important that you read with your student every day. Set aside time to read to your student and to listen to your student read to you.

Be sure to praise your student whenever they share what has been learned at school.

Navigation in the Age of Exploration

Do you ever go on trips with your family? How do the adults in your family find the places they want to visit? Do they write down directions? Do they use maps? Do they look for **landmarks** along the way? Do they have an electronic **device** that tells them where to turn?

Early European explorers didn't have most of those things. Most sailors in those days stayed close to land and looked for familiar **landmarks**. However, this would not work for explorers. They could not look for familiar **landmarks** because they were sailing into unknown waters.

Early explorers did have some maps but they were not always **accurate**. So how did the explorers **keep track** of where they were?

They had several tools that they might have used. One of them was a **compass**. A **compass** is a very simple **device**. It is just a little **magnet** that sits on a pin so it can spin. The pointer on the **magnet** points north. Back then, nobody knew why. Now, we know it's because Earth has a **magnetic field**, which is strongest at the poles. **Magnets** are attracted to the **magnetic field** of the North Pole.

Using a **compass**, an explorer could figure out which direction was north. Plus, if he knew which direction was north, he could figure out south, east, and west. That was a big help.

Explorers also used the stars to **keep track** of their position. Sailors in this day used two **gadgets**. One was called a **quadrant**. The other one was called an **astrolabe**. The details of how these **gadgets** work are complicated but the basic idea is not. The idea is that you can **keep track** of your position on Earth

DATE:

by **keeping track** of where certain stars appear to be in the night sky. If you can tell where the sun, the North Star and other key stars are, you should be able to figure out where you are on Earth.

Others may have **kept track** of how far they had traveled using a **method** called **dead reckoning**.

Here's how **dead reckoning** worked: a sailor had a piece of wood that was tied to a rope. The rope was knotted at regular intervals. There might be a knot every five feet. The sailor would toss the piece of wood overboard while the ship was sailing. When the wood hit the water, the sailor would turn over an **hourglass**.

The sailor or the captain of the ship would then watch to see how much rope was pulled out of the ship and into the sea. If the ship was going fast, it would quickly leave the piece of wood behind. It would pull many yards of rope out of the ship before the **hourglass** ran out. If the ship was going slower, it would not pull as much rope out. Then, the person would count how many knots of rope got pulled out of the ship before the **hourglass** emptied out. If you have ever heard of a ship's speed referred to as knots, this is a **forerunner** of that measurement of speed.

A ship's captain could use **dead reckoning** to make an **estimate** of how fast the ship was moving. Then, he could **estimate** how far the ship would travel in an hour or a day. He could use a **compass** to know which way he was heading. He could put all this together to make an **estimate** of where he was.

Linking Words in conclusion

Add a concluding sentence for each paragraph, beginning with the words in conclusion.

Our substitute teacher, Mr. Brown, was a "grammar whiz" and excitedly taught the grammar lesson to our class. It seemed as though he loved grammar more than any other subject. His examples were full of details and information. He called on students to share their ideas and made everyone feel very smart. At the end of the
lesson, all of us understood what he taught us.
Our class trip to the zoo was a day to remember! We all got on the bus and took
our assigned seats. Mrs. Washington had paired us up with friends so we all chatted
happily as we rode to the zoo. Then, we arrived at the zoo and began to follow
the guide around to look at the many kinds of animals. It was so cool to see lions,
tigers, and the different kinds of birds, and many of us were taking pictures.
We must have walked for miles and miles to see all of the animals. At the end
of the day, we were all tired but full of great memories.

Performing before an audience for the first time is both scary and exciting. When I reached third grade, my parents decided I should take piano lessons, something I had dreamed of for years. They bought a second-hand piano at a thrift shop, had it put in my bedroom, and hired a teacher named Miss Sanders. She and I were instant friends, and I loved each and every lesson I took from her. After three months, it was recital time, and I was ready to play two songs I had learned by heart. As I walked up to the piano in her studio to play my songs, I looked at all the parents and families who had gathered to hear Miss Sanders' students perform, and I thought I would faint. I was so afraid I would make a mistake or forget how to play the songs. But I just took a deep breath and was able to remember every note. When I was finished, I happily took a bow as the audience applauded.

TAKE-HOME

El Castillo de San Marcos

The building on the right is a **fort** in St. Augustine, Florida, where the Spanish **established** a settlement in 1565. It is the oldest **continuously occupied** European settlement in the United States. You can visit there today and still see the old buildings standing.

This **fort** was built by the Spanish in the 1600s. It is called El Castillo de San Marcos. That is its Spanish name. Its English name is the Castle (or **Fort**) of Saint Mark.

El Castillo de San Marcos was not the first **fort** the Spanish built in St. Augustine. The Spanish built seven or eight **forts** before they built this one. But these earlier **forts** were made of wood and were not very strong. Some of them were **destroyed** in wars. Others were **wrecked** by hurricanes. In 1672, the Spanish decided to build a new **fort**. This time, they decided they would use stone to make it strong.

This is what a **bastion** looks like from the ground.

Imagine you are a soldier. Would you like to attack a **bastion** like this? How would you do it?

If you tried to get close, Spaniards on top of the **bastion** would open fire. They would shoot at you with guns and cannons.

If you got close enough to set up a ladder, the men in the **fort** would tip it over. They might drop hot oil on you. Ouch!

You could try to attack with cannons. But the walls of the **fort** are thick and strong. A few cannonballs would not harm them. But don't forget, the

Spanish had cannons of their own. They would fire back at you and you would not have thick stone walls to hide behind!

Can you guess what the walls of El Castillo de San Marcos are made of? Believe it or not, they are made of seashells! The Spanish used a kind of rock called **coquina**. **Coquina** is a mixture of **fossils** and seashells.

Look at the stone on the right. It is **coquina**. Can you see the seashells? Those shells are the remains of tiny animals that lived in the sea long, long ago. The Spanish found **coquina** along the Florida seashore. They used it to build the **fort**.

Coquina turned out to be a good stone for building **forts**. It is softer than other rocks. That means it does not crack or **shatter** when cannonballs hit it. A cannonball might make a dent in a **coquina** wall or it might be absorbed into the wall. But, in most cases, it would not crack the wall.

The **fort** was surrounded by a **moat**. It is no longer filled with water. It is now a dry **moat**.

There was only one way into the **fort**. You had to enter a mini-**fort** that stood just in front of the main **fort**. This mini-**fort** was called the **ravelin**.

A bridge led from the **ravelin** across the **moat** and into the main **fort**. The last part of this bridge was a drawbridge. It could be lifted up to keep people from getting in.

It was not easy to open the drawbridge. It took five men fifteen minutes to open it.

In this image, you can see the bridge that leads into the **fort**. It is on the left.

El Castillo de San Marcos was a strong **fortress**. It was attacked many times but it was never captured.

TAKE-HOME

Second Sons

Did you know that many explorers had older brothers? Very few of them were the oldest sons in their families.

Can you guess why that might be?

DATE:

It's not because firstborn children didn't want to go out and explore the world. It has to do with the laws in Europe at the time. Most countries in Europe had laws about who could **inherit** an **estate**. These laws stated that the oldest son in a family would **inherit** all of his father's land, goods, and money.

This was true for kings. When a king died, he would be replaced on the **throne** by his eldest son. A daughter could only become queen if a king had no sons.

This was also true for **nobles**. For example, if the Duke of Richland died, his eldest son would become the new Duke of Richland. This eldest son would **inherit** everything his father owned.

What did the younger sons and daughters get? Nothing.

This system is known as **primogeniture**. Primo means "first." "Geniture" means born. **Primogeniture** is a system in which the firstborn son **inherits** everything when his father dies.

This way of doing things seems very strange to us today. It also seems unfair. Most parents today would not leave all their money and **property** to their oldest son. They would split the money and **property** up among all their children. Why, then, did Europeans do things differently back in the 1400s and 1500s?

There is actually a good reason. Let's go back to the Duke of Richland. Imagine that he is a wealthy landowner living in a land with no law of **primogeniture**. Let's say he owns 1,000 acres of good farmland. But, alas, he dies. His land is split between his two sons. So now we have two men, each of whom has 500 acres of land. Now, suppose each of these two men has four sons. When the fathers die, their lands are split again. So now we have eight men with 125 acres each. Do you see what is happening? The **estate** of Richland is being split up. It is no longer big and **impressive**. It is becoming small and unimportant. The men of Richland are probably also becoming less powerful because they each have less land.

Also, who is the Duke of Richland now? Are all eight of his grandsons now dukes? Will their grandsons also be dukes? At this rate, the land will be **overrun** by dukes!

The **nobles** did not want this to happen. They wanted to keep their lands together, so their families would remain powerful. They wanted there to be one Duke of Richland and they wanted him to remain one of the most powerful men in the country. That is why they passed laws of **primogeniture**.

This was good news for the oldest son in each family. It was bad news for the other sons and for all the daughters. They had to find other ways to make money and gain power.

One way to do this was to be an explorer. If you could not **inherit** anything in your homeland, why not sail off and discover some other way to make your fortune?

This is, in fact, what many second sons did in the late 1400s and 1500s. They went in search of ways to make money they would never have **inherited** if they stayed in Europe.

TAKE-HOME

Caregiver Letter

Dear Caregiver,

Please help your student succeed in spelling by taking a few minutes each evening to review the words with them. Helpful activities for your student include: spelling the words orally, writing sentences using the words, and simply copying the words.

Spelling Words

This week we are reviewing spelling patterns we've learned for $|\underline{oo}|$: oo, ew, o, and o_e . Your student will be assessed on these words.

Students have been assigned three Challenge Words, *country*, *through*, and *threw*. Challenge Words are words used very often and need to be memorized. The Challenge Word *threw* does follow one of the spelling patterns for this week. Although *through* also makes the /oo/ sound, it contains a very rare spelling.

The Content Word for this week is *discovery*. This word is directly related to the material we are reading in *The Age of Exploration*. The Content Word is an optional spelling word for your student. If your student would like to try it, but gets it incorrect, it will not count against them on the assessment. We encourage students to stretch themselves a bit and try to spell this word.

The spelling words, including the Challenge Words and Content Word, are as follows:

1. remove	8. newborn	15. kangaroo
2. dewdrop	9. chewing	16. toothache
3. groove	10. whoever	17. improve
4. shrewd	11. strewn	Challenge Word: country
5. booth	12. disapprove	Challenge Word: through
6. movement	13. undo	Challenge Word: threw
7. balloon	14. lose	Content Word: discovery

Student Reader

The chapters your student will read this week in *The Age of Exploration* include information about Spanish, English, and French explorers. Also, your student will read about two reasons for exploration: to claim land for a specific European country and to establish trade with Native Americans. Students will also read a description of a young sailor's life on a ship. Be sure to ask your student each evening about what they are learning.

NAME:			

Coronado Reports to the King

Francisco Vasquez de Coronado was a Spanish conquistador. He explored what is now the American Southwest in search of the Seven Cities of Cibola [SEE-boe-lə], which were said to have streets paved with gold. During the trip, Coronado wrote letters to the King of Spain. In his second letter, written in October of 1541, he described his march across the Great **Plains** to Quivira [Kee-VEE-rə], in modern-day Kansas. He told the king about the native people he and his men met. He also described the buffalo they saw, which he called "cows." On the pages that follow is an edited version of Coronado's letter.

Your Majesty,

DATE:

After I sent my last letter, I met some native people from a **distant** land. They **boasted** of their land, which is called Quivira. They said the men there lived in large houses. They said their chiefs dined on dishes made of gold. I did not know whether to believe these reports. I made up my mind to go and see Quivira.

We set off last spring and reached the **plains**. These **plains** were **vast**—so **vast** that we could not see the end of them. They were flat and open with grasses that blow in the breeze. We traveled over them for more than 300 **leagues**. The **plains** were full of cows. There were too many of them to count. There was not a single day when we did not see some of them.

After 17 days, we met some native people. They are called Querechos [Ker-AE-koez]. They do not plant crops. They travel around with the cows. They eat the flesh of the cows they kill. They **tan** the skins of the cows and make clothes from them. They have little tents made of cowhide. They live in

TAKE-HOME

these tents while they travel around with the cows. They have dogs that carry their tents and poles from place to place.

We traveled 42 days more. At times, it was hard to find the way. On the **plains**, there are few landmarks. There are no hills. There are no stones, trees, or shrubs. All we could see was a sea of grass.

We lived on the flesh of the cows we killed. We went many days without water. Sometimes, what we drank was more mud than water. There are no trees on the **plains** except by the rivers. So, we could rarely find firewood.

After 77 days, we arrived in Quivira.

This was the place our guides had described. They had told us of stone houses that were many stories tall. But we found only little grass huts. There were only a few people in the place and they were as **barbarous** as the others we have met. They swore to obey Your Majesty and placed themselves under your **royal lordship**.

The natives gave me a piece of **copper**. I have sent this back to the **viceroy** of New Spain. I have not seen any other metal in these parts except this and some little **copper** bells.

We stayed in Quivira for 25 days. I searched the nearby lands to see if there is anything which could be of service to Your Majesty. Besides the land itself and people who live on it, I have not found or heard of anything. I am sure there is no gold here.

The land in Quivira is the best I have seen for producing crops. The soil is black. The land is well-watered by springs and rivers. I found some **prunes** like those in Spain. There are some nuts. There are also very good sweet grapes and **mulberries**.

NAME: ______

6.5

TAKE-HOME

I have treated the natives as well as was possible, as Your Majesty commanded. They have received no harm in any way from me or from those who went in my company.

This is my report. I have done all that I possibly could to serve Your Majesty. I remain Your Majesty's **humble** servant and **vassal**,

Francisco Vasquez de Coronado

TAKE-HOME

Caregiver Letter

Dear Caregiver,

We hope your student is enjoying learning about the European explorers of North America. We are now embarking on the second half of this domain. In these lessons, students will learn about the Spanish settlements in North America, including the first continuously inhabited European settlement of St. Augustine in present-day Florida. Your student also will learn about the expeditions of John Cabot, Henry Hudson, and Samuel de Champlain.

Below are some suggestions for activities that you may do at home to underscore what your student is learning about European explorers of North America.

1. Discussion and Geography

Ask your student to tell you what they have learned so far about the Spanish settlements in North America. Ask your student to describe how the objectives of the explorers changed over time from conquest to settlement. Ask your student to explain the differences between what conquistadors wanted versus what the later missionaries wanted in the New World. (In the beginning, the Spanish conquistadors were looking for riches. Over time the explorers and missionaries wanted to inhabit the land to "civilize" it and create allies for Spain.) Ask your student to locate on a map the present-day states where these Spanish settlements were. Guide your student in locating the states of Florida, Texas, Arizona, New Mexico, and California on a map.

2. Explorers

Over the next several days, ask your student to tell you what they know about the explorers John Cabot, Henry Hudson, and Samuel de Champlain. Ask her or him what countries they were from and which countries funded their expeditions. Ask your student to identify the areas of North America that these men explored on a world map or globe. Have your student describe the explorations of these Europeans.

3. Compass and Directions Activity

Go outside with your student, taking along a compass (or print and use the compass rose at www.marinersmuseum.org to make your own). Relative to your home, identify the directions of east, west, north, and south. Have your student draw an aerial view of your home and its surroundings and indicate these directions on her/his sketch. Remind your student that when they learned about the Vikings and the Native Americans earlier this year, they learned a mnemonic device to remember the cardinal directions: "Never Eat Soggy Waffles." (Start at the top of the map and label it 'N' for north; then proceed clockwise to place the other cardinal directions on the map.) Think about the states that border your state. Ask your student in which direction they would have to go to get to those various states. Now ask about the countries of Canada and Mexico: which way would they have to travel to get to those countries? In which direction would they travel to get to the Atlantic Ocean or Pacific Ocean?

4. Sayings and Phrases: Touch and Go

Discuss with your student what the saying "touch and go" means. The saying "touch and go" refers to a dangerous situation or precarious condition. The saying comes from a nineteenth-century British nautical term used to describe a ship that has almost run aground. If the ship touches bottom without getting stuck, it is able to float clear or go again. Think of a recent "near miss" you or your student experienced, and how this saying can be used to describe that incident.

5. Words to Use

Below is a list of some of the words that your student will be learning about and using. Try to use these words as they come up in everyday speech with your student.

- *achievements*—The Nobel Peace Prize winner's many achievements were celebrated at the last award ceremony.
- *navigational*—The compass is a navigational tool because it always points north and helps you know where you are and where to go.
- *unfamiliar*—When Dorothy came out of her tornado-damaged house and saw the unfamiliar world of Munchkin Land, she knew she wasn't in Kansas anymore.
- *envisioned*—Christopher Columbus envisioned a much smaller world than what he encountered in reality.

6. Read Aloud Each Day

It is very important that you read with your student every day. Set aside time to read to your student and to listen to your student read to you.

Be sure to praise your student whenever they share what has been learned at school.

John Cabot

John Cabot (known as Giovanni Caboto [JEE-oe-VO-nee CA-bu-toe] in his native Italy) had the same dream as Columbus: to reach Asia by sailing west. However, unlike Columbus, Cabot thought the best chance of reaching Asia would be to sail around the northern part of Earth, where the distance around would be **substantially** shorter than the distance at the **equator**. Cabot, like other explorers, wanted to find the Northwest Passage, which was thought to be a shorter route west from Europe to Asia. Finding a shorter route to Asia meant finding a shorter route to spices.

Many details of Cabot's life and voyages are unknown. He did not keep records during his voyages nor was much written about his life. However, it is known that he was Italian and had support from King Henry VII of England for his voyages. King Henry VII gave Cabot a **charter** to explore and **claim** land for England.

Cabot made his first **attempt** to find the Northwest Passage in 1496. This **attempt** was a failure. He had a disagreement with some members of his crew. There was also a **shortage** of food and he ran into bad weather. Cabot decided to turn back for England.

Cabot tried again in 1497, with a single ship and a crew of 18. This time, he reached land, which he thought was Asia. However, this land turned out to be the coast of North America. It is not known exactly where he first sighted land, though. It may have been the coast of Newfoundland. Cabot spent a short time exploring the coast and it is possible that he sailed as far south as the Chesapeake Bay. During this voyage, Cabot found a large area of **shallow** water

TAKE-HOME

that was abundant with fish. This area, known as the Grand Banks, is still one of the best fishing areas in the world today. At any rate, Cabot and his men became one of the first European **expeditions** to see the **landmass** now known as North America.

Cabot sailed back to England with his news. Certain that he had found a new, shorter route to Asia, Cabot gained support for another, much larger **expedition**. This **expedition** left England in 1498, but it never returned. Nobody knows for certain what happened to Cabot and his men. In time, it became clear that Cabot had not, in fact, located the Northwest Passage. However, England based its later **claims** to North American **territory** on Cabot's explorations. When Cabot had first sighted land, he had gone **ashore** and **claimed** it for England. Cabot's exploration began England's desire to explore and create settlements in North America.

Do you think you could be a sailor on Cabot's ship? Here is a description of what it might be like to be a young sailor.

On a ship, young boys served as **pages**. On land, a **page** worked for a knight. At sea, he worked for a captain. **Pages** did all sorts of odd jobs. They carried messages, mopped the deck, helped pass out food, and cleaned up after meals.

Older boys might be asked to work the **bilge pumps**. Even the best ships sometimes sprang a leak. If a ship leaked too much, it might sink. To keep that from happening, sailors had to pump water out of the ship using a **bilge pump**. This was a terrible job. The bilge water was disgusting. It smelled bad and it made the sailors sick.

After pumping bilge water all day, it would have been great to sit down to a nice, warm meal. Unfortunately, sailors did not get many warm meals. For most meals, they got **hardtack**.

Hardtack was a kind of bread that was baked over and over. Hardtack was so hard, it was tough to eat. Sailors had to soak it in a drink to soften it up. The good thing about hardtack, though, was that it would not spoil on a long voyage. It was so hard, bugs had trouble getting into it—unless it got wet. Once it got wet, weevils and other bugs could and did get into it. But you could usually see them and brush them off with your fingers.

If a voyage was going well, sailors might get other kinds of food. They might get a little salted meat now and then. They might get some fish or a few beans. But if supplies were running low, they might get nothing but **hardtack**.

The diet on sailing ships was so bad that many sailors got sick. Lots of them got a disease called **scurvy**. Today, we know that **scurvy** is caused by a lack of vitamin C, found in fresh fruits and vegetables. In the Age of Exploration, people did not know this. So many sailors died.

After a long day of work, sailors were ready to fall into bed and rest their aching bones. They were ready—but there were no beds for them to fall into. The captain had a bed to sleep in, but the sailors did not. They slept on the deck. As the ship rolled back and forth with the waves, the sailors rolled with it.

Most sailors had to stand **watch** for part of the night. When that was done, they could sleep for a few hours. In the morning, they would get up and do it all over again. A sailor's day started bright and early.

So, what do you think? Does a sailor's life sound good to you?

Henry Hudson

An Englishman named Henry Hudson tried four times to find the Northwest Passage. He died trying.

First, in 1607, he tried sailing north from England. If you look at a globe, you can see what he was trying to do. He understood that Earth was round and he thought he could sail across the North Pole. He didn't understand that **solid** ice always covers the Arctic Ocean. "I hoped to have a clear sea," Hudson wrote of his first journey, but "that proved impossible due to the ice surrounding us."

Hudson tried again in 1608. He sailed northeast and again found **icebergs** and freezing weather. He turned his boat around and tried sailing northwest. When his crew realized that they weren't heading home, they **rebelled** against Hudson, saying they wouldn't work unless they sailed to England. So, home they went.

In 1609, Henry Hudson sailed west. This time, he was working for a group of businessmen called the Dutch East India Company. On this trip, he reached North America and claimed land for Holland.

Hudson saw many native people. One man who sailed with him wrote in his journal, "They are well-dressed in loose deer skins and brought green tobacco which they gave us in exchange for knives and beads." The native people also gave the sailors bread made of **maize**.

Hudson sailed past "a very good piece of ground and a cliff close by of whitegreen color...on the side of the river called Manna-hata." It was the island we now call Manhattan (the center of New York City today). Next, Hudson sailed up a river that still bears his name. You'll find the Hudson River on a map of the state of New York.

In 1610, Hudson tried once more to find a shortcut from Europe to Asia. He sailed a ship called *Discovery* into a wide **expanse** of water in the northern part of Canada. Today, it is named after him: the Hudson Bay.

On the map, the Hudson Bay looks like a big, open body of water. But in many places, the water gets too shallow for sailing. In many other places, it is frozen **solid** almost all year long. Once again, Henry Hudson had sailed into icy waters, just as winter was coming.

Hudson and his crew went ashore during the winter. They ran short of food and water. Some of the crew got sick. Some died. The sailors blamed Hudson for caring more about finding the Northwest Passage than about keeping his crew safe and healthy.

When the ice began to melt, the crew **rebelled**. They forced Hudson, his son, and a few crew members loyal to Hudson to get into a small boat with no oars. Then, they left them behind and sailed the *Discovery* back to England. No one ever heard from Henry Hudson again.

Caregiver Letter

Dear Caregiver,

Please help your student succeed in spelling by taking a few minutes each evening to review the words with them. Helpful activities for your student include: spelling the words orally, writing sentences using the words, or simply copying the words.

Spelling Words

This week, we are reviewing spelling patterns we've learned for /f/ spelled 'f', 'ff', 'ph', and 'gh'. On Friday, your student will be assessed on these words.

Students have been assigned three Challenge Words, *probably* and *weather/whether*. Challenge Words are words used very often. The Challenge Words do not follow the spelling patterns for this week and need to be memorized.

The Content Word for this week is *expedition*. This word is directly related to the material that we are reading in *The Age of Exploration*. The Content Word is an optional spelling word for your student. If your student would like to try it, but gets it incorrect, it will not count against them on the assessment. We encourage students to stretch themselves a bit and try to spell this word.

The spelling words, including the Challenge Words and Content Word, are listed on the back of this Activity Page.

The Fur Trade and Samuel de Champlain

Many of the Frenchmen who came to North America in the 1600s and 1700s were fur **traders**. These **traders traded** with the native people. They gave them European goods **in exchange** for animal skins and furs.

The **traders** collected many kinds of fur but they were most interested in beaver **pelts**. Beaver hats were popular in Europe. You could sell beaver hats in England, France, Germany, and Russia.

Why were beaver hats so popular? For one thing, beaver fur is thick. It is thick enough to keep your head warm in a cold Russian winter and it is waterproof. Rain runs off a beaver hat. Your head stays dry.

Some hat makers used the beaver fur as it was. They made soft, puffy hats. Others processed the beaver fur to make **felt**. The smooth, waterproof **felt** was then formed into hats. **Felt** hats did not look like they were made of beaver fur. But, they were.

In many parts of Europe, there were no beavers left. Hunters had killed too many of them. The beaver had almost gone extinct. Europeans could not get beaver **pelts** at home. So, they were willing to pay for beaver **pelts** imported from North America.

Samuel de Champlain and other Frenchmen took the lead in the fur **trade**. They set up **trading posts** in North America. There were **trading posts** along the Atlantic Coast. There were **trading posts** in Quebec and along the St. Lawrence River. There were even **trading posts** farther west, along the shores of the Great Lakes.

The following is an adaptation of Champlain's journey down the River of the Iroquois to the lake that came to bear his name: Lake Champlain.

July, 1609

We continued on our journey until we came to an island. The island was about three leagues long and had the **finest** pine trees that I had ever seen. We went hunting here and captured some wild animals.

The next day, we started out again, floating down the river as far as the entrance to a large lake. There were many pretty islands there. They all contained many **fine** forests and **lush** meadows. There were too many birds to count. Also, we saw all kinds of wild animals such as deer with their young fawns, bears, and many animals that move from the mainland over to the islands and back again. We captured many of these animals as well. There were many rivers that emptied into the lake as well as dense forests of **fine** trees. I found chestnut trees on the border of the lake. I had never seen trees like this before. There were great numbers of fish in the lake.

I noticed that many of the mountains in the distance to the north had snow on top of them. I was told that the Iroquois lived there and that there were many beautiful valleys with fruit and grain there.

Many different native groups lived in these lands. The French made **treaties** with some of them, including the Algonquin [al-GON-kwin] people and the Huron [HYER-on] people. The French agreed to **trade** with these people and not fight with them.

NAME:		
DATE:		

The native people would bring beaver **pelts** to **trade**. In some cases, they would bring **pelts** they had gathered themselves. In other cases, they would bring **pelts** they had **obtained** by **trading** with other native people.

The French would **barter** with the native people. They would give the native people things they wanted **in exchange** for the beaver **pelts**.

Many of the things the native people wanted were made of metal. Most native people did not make their own metal products. They had to **trade** for these items. Many native people **traded** furs for knives and ax blades. Others **traded** for kettles and fish hooks. Still others **traded** for glass beads from Europe, which were highly desirable.

The French would gather up lots of beaver **pelts**. Then, they would ship the **pelts** back to France and sell them. They made a lot of money doing this, so they did it again and again.

As time went on, the French learned what the native people liked. They learned that many native people would **trade** beaver **pelts** for wool blankets. Some would **trade** for tobacco. Others would **trade** for guns and gunpowder.

In 2011, the people of Canada put an image of a beaver on the back of their nickel. They did not put the beaver on their nickel because he is cute. They put the beaver there because the fur **trade** is an important part of the history of Canada. For two hundred years, the fur **trade** was a source of **income** for the French and the native people alike.

A History of People in North America

Lots of people think that Columbus was the first to arrive in America. But that's not right. There are at least two other groups of people who settled in North America and both of them got there many years before Christopher Columbus.

One group was the Vikings.

The Vikings lived in Northern Europe, in Scandinavia. They sailed around a lot, **raiding** and robbing as they went. The image on the next page shows you some of the places they explored and some of the Vikings who were explorers.

In 982, some Vikings left Iceland and settled in Greenland, which is part of North America. They arrived there about 500 years before Columbus sailed. The Viking settlements on Greenland grew for a while. Archaeologists estimate there were probably 3,000 to 5,000 Viking settlers there at one point. Eventually, however, the Vikings left. Viking settlements in Greenland seem to have been **abandoned** in the 1400s, not long before the voyage of Columbus.

The Vikings also explored lands west of Greenland. Around the year 1000, the famous Viking explorer Leif Eriksson visited a land he and other Vikings called Vinland. Most experts believe Vinland was somewhere along the coast of Newfoundland, in modern-day Canada. There is **evidence** that some Vikings settled in Newfoundland. In 1960, the ruins of a Viking village were found there. This village may have been part of Vinland.

The Vikings definitely got to America before Columbus. So maybe we should say the Vikings were the first Europeans to settle in North America. But before we decide, we need to look at another group that settled in North America.

Another group to settle in North America was the Native Americans.

Although we call these people "Native" Americans, they did not always live in the Americas. They came to America from Asia. When and how this happened are subjects of much **debate**.

Some historians think the first settlers made their way to North America a little more than 15,000 years ago. Others think the first people came to America many years earlier—perhaps even 40,000 years ago. Some experts think these people came by land, at a time when Alaska and Asia were connected by land. Others think they may have traveled along the coast in boats.

The map on the next page shows how we think human beings spread around the earth. Experts think the first humans lived in Africa. About 100,000 years ago, some humans moved out of Africa and into the Middle East. About 70,000 years ago, a group of humans moved into southeast Asia. About 15,000 years ago—or possibly earlier—some of these people crossed from Asia to the Americas. It is believed that many people also came to North America by various ship routes.

New archeological discoveries continue to be made every day about early settlers in North America. These discoveries change our understanding of who lived in North America in the past.

DATE: _____

Unit 9 Assessment

Christopher Columbus, Salesman

Look up Christopher Columbus in an encyclopedia. Chances are the entry will say that he was an explorer. That is not wrong. Columbus was, indeed, an explorer. But, did you know that he was also a salesman?

Columbus had an idea. His idea was that he could get to the Indies by sailing west. He believed Earth was smaller than most people thought. He thought that the Indies were probably about 2,400 miles from Europe. He believed he could sail there in a few weeks.

How would he pay for the voyage? That was the big question. Columbus was not a rich man. He did not have the money he would need to buy ships and hire sailors. Only a few people in his day had that kind of money. Most of them were kings and queens.

Columbus knew he had to sell his idea. He had to find someone who would pay for his voyage. It might be a king. It might be a queen. It might be a rich banker. It might be a bunch of bankers who would pool their money together.

In 1485, Columbus went to Portugal. He met with John II, the King of Portugal. He asked the king for three ships. He said he would need the ships for a year. Would that cost a lot? Yes, it would. "But," Columbus said, "just think how rich you will be if I reach the Indies! Think of the gold! Think of the spices!"

King John was interested. He showed the plan to his advisors. They studied it. In the end, they told the king not to fund it. They said Columbus was wrong about the size of Earth. They thought the Indies were much farther away than Columbus said.

Guess what? They were right.

In 1486, Columbus tried again. He met with King Ferdinand and Queen Isabella of Spain. He explained his plan. He spoke of the wealth and riches he would bring to Spain if he reached the Indies. The king and queen were busy fighting a war against the Moors, but they were interested. They showed the plan to their advisors. The advisors studied the plan. They said it was a bad plan. They were sure it was a lot farther to the Indies than Columbus thought.

In 1488, Columbus went back to Portugal. He tried to sell his idea to King John II again. Once again, it was "no sale."

Columbus went back to his hometown, Genoa, Italy. He tried to convince some wealthy men there to fund his voyage. Again, it was "no sale."

Columbus went to Venice. He spoke to some rich men there. Once again, "no sale."

Columbus sent his brother to England. He told him to try to sell the idea to King Henry VII. His brother made the pitch, but it was "no sale."

Some men would have given up. Probably most men would have given up. But Columbus was a very determined man. He was sure his plan was a good one, and he kept on trying to sell it.

IAME:		4 1
		TO I
DATE	()	ONTINUED

Finally, in 1492, he closed the deal. By this time, the Spanish had driven the Moors out of Spain. King Ferdinand and Queen Isabella agreed to fund the voyage. Columbus the salesman had succeeded. That meant Columbus the navigator would get a chance to make the voyage he had been thinking about for more than a decade.

1.	Using the numbers 1–5, arrange the following events in order.
	Columbus went back to Portugal and asked for money again.
	Columbus sent his brother to England to ask for money.
	Columbus met with John II, the King of Portugal to ask for money.
	Columbus met with King Ferdinand and Queen Isabella of Spain, and they agreed to fund the trip.
	Columbus had an idea that he could get to the Indies quickly.
2.	Write true or false on the blank following the sentence.
	Columbus thought he could sail east to get to the Indies and would arrive in a few weeks
3.	Why would the king and queen of a country decide to fund an explorer's expedition to an unknown land?

NAME:			
DATE:			

4. What do the words <u>closed the deal</u> mean in the following sentence from the selection?

Finally, in 1492, Columbus closed the deal.

- A. The king and queen said "no sale" to Columbus.
- B. Columbus thought Earth was smaller than other explorers thought.
- C. The King and Queen of Spain agreed to fund his voyage.
- D. Columbus showed his plan to the King of Portugal who sold him land.
- 5. When Columbus asked King Ferdinand and Queen Isabella for funding the second time, what had changed that allowed them to agree to the funding?
 - A. Columbus was a salesman and a navigator.
 - B. The war between Spain and the Moors had ended.
 - C. The king and queen were interested in Columbus' plan.
 - D. The wealthy men of Genoa, Italy convinced the king and queen to fund the voyage.
- 6. Write the correct word on the blank in the sentence.

The black and white puppy wagged ______ tail in delight upon seeing his owner. (its, it's)

7. Use the following portion of a dictionary page to answer the questions below.

flock 1. *verb* To join together in a group. 2. *noun* A group of animals, usually birds.

Which definition of *flock* is used in the following sentence?

The moviegoers *flock* together at the entrance of the theater.

What part of speech is *flock* in this sentence?

- 8. Which of the following words with the prefix *pro* could be used to describe what Columbus shared with kings and a queen about his idea?
 - A. prologue
 - B. proposal
 - C. progress
 - D. prophecy

Bartolomé de Las Casas: Protector of the Native Americans

Have you ever changed your mind about something? That is what happened to Bartolomé de Las Casas.

Las Casas lived with the conquistadors for many years. He helped them conquer the Americas. Then, he decided that this conquest was wrong. He spent the rest of his life fighting against the conquistadors and trying to protect Native Americans.

Las Casas was born in Spain in 1484. He was eight when Columbus made his first voyage. Ten years later, in 1502, he sailed to the New World. He became a plantation owner on the island of Hispaniola. He enslaved people. He helped conquer the native people.

In 1510, Las Casas became a Catholic priest. He was the first priest ordained in America. At first, this was not a problem. Las Casas felt that he could be a plantation owner and a priest. He did not see any conflict between his religion and his role as a plantation owner.

In 1513, his thinking began to change. In that year, he took part in the conquest of Cuba. What he saw shocked him. The Spanish were very cruel. They treated the native people like animals. Las Casas found this disturbing. He began to rethink his views.

In 1514, Las Casas made a big decision. He decided that what the Spanish were doing in America was wrong. It was wrong to kill and enslave people. It was not moral. It was not ethical. It was not consistent with the Christian religion.

Las Casas felt ashamed of himself. He felt ashamed of the things he had done. He felt ashamed of the way he had been living. He gave up his plantation. He freed the people he had enslaved. He tried to convince others to do the same, but he did not have much luck.

For the rest of his life, Las Casas fought to protect the Native Americans. He went back to Spain. He spoke to the king and other important men. He told them what was happening in the colonies. He told them about the cruelty of the conquistadors. He tried to change the way people thought about the Native Americans.

At the time, many Spaniards felt that it was okay to use force against non-Christians. They thought the Native Americans were pagans, who did not believe in the Christian God. Native Americans believed in many gods. Their religion seemed like devil worship to many Spaniards. Many Spaniards believed that it was okay to conquer the natives and force them to accept Christianity.

Some people went even further. They argued that conquest was the only approach that made sense. The Native Americans were barbarians. They could not think for themselves. They were fit only to be enslaved people. It was not just okay to enslave these people. It was the proper thing to do. It was the best way to save their souls. It was also the only way to protect the weaker Native Americans from the stronger Native Americans.

DATE:

Las Casas argued against this way of thinking. He insisted that the Native Americans were capable of thinking for themselves. They deserved to be treated as free men. They should not be conquered and enslaved. They should be converted to the true faith. But, they should be converted by peaceful means.

Las Casas fought to change the laws. He worked to set up colonies where the Native Americans would be treated fairly.

Las Casas also wrote books. His most famous book was *A Brief Account of the Destruction of the Indies*. This book is an attack on Columbus and the conquistadors. Las Casas blamed these men for their cruel treatment of the natives. "These men did not behave like human beings," Las Casas said. "They behaved like lions and tigers. What made them behave this way? It was greed. They were driven by greed for gold."

As you might have guessed, Las Casas was not popular in the Spanish colonies. The Spanish settlers hated him. They felt that he was trying to take away land, power, and enslaved people they had acquired fairly. They saw Las Casas as a traitor. They saw him as a man who sided with the enemy against his own country.

Las Casas was not afraid to be hated. He was a man of great courage. He was sure he was right. He kept fighting for fifty years, until his death in 1566.

18. Use the following portion of a dictionary page to answer the questions below.

land 1. *verb* To arrive on a runway after flying in the air. 2. *verb* To achieve something you have applied for. 3. *noun* The ground under your feet. 4. *noun* A country.

Which definition of *land* is used in the following sentence?

This great *land* of ours is called the United States of America.

What part of speech is *land* in this sentence?

19. Circle the correct word to complete the sentence.

My new jacket is $\frac{}{\text{(reverse, reversible)}}$ which means I can wear it outside out or inside out.

20. Write the correct linking words in the blank in the sentence.

The prince wears rich clothing and rides a fearsome stallion.

 $\frac{}{\text{(In the same way, In contrast)}}$ the princess wears lavish dresses and flowing

scarves and rides a sleek, white steed.

The Duke and His Guest

Many years ago, in a land far, far away, there lived a wise king. One day, while he was out riding, the king passed a beautiful house.

"Who lives in that house?" he asked his servant.

"Your Majesty," the servant replied, "the Duke of Luxford lives there. He is one of the richest men in the land. He puts on the most wonderful feasts for his wealthy friends!"

"What does he do for the poor?" asked the king.

"Nothing," answered the servant.

The next day, the king dressed himself in old, ragged clothes and went to the duke's house.

The duke came to the front door.

"O Great One," said the king, bowing low, "won't you give me a little food and let me rest in your beautiful home? I am hungry and tired."

"Be gone!" shouted the duke. "Get off my property at once or I will have my servants beat you away. I will not have beggars hanging around my house!"

The king went away.

The next day, the king put the old, ragged clothes on again. Then, he covered his ragged clothing with a handsome, silken cloak trimmed with gold and jewels.

He went once more to the duke's home.

As before, the duke came to the door. When he saw the stranger in the rich cloak, he spoke to him and invited him in.

"Come in, my friend," the duke called out. "Come in and join us! It is a great pleasure to entertain a man like you in my home!"

The king took some of the rich food and broke it into small pieces. But, instead of eating the food, he put it into the folds of his rich cloak.

"Why do you not eat the food?" asked the duke. "Why do you put it in your cloak?"

"Yesterday I came to you dressed like a poor man and you drove me away.

Today, because I have this fine cloak, you have invited me to dine with you.

But, I am the same today as I was yesterday—still your king."

Then, the duke knelt down.

"Oh, forgive me, Your Majesty!" he cried. "I have been proud and selfish. I will mend my ways. From this day on, no poor man shall be driven from my door. You have taught me that a man is more than his clothes."

1. W	hy did the king ask the servant what the duke did for the poor?
	hat does the word <u>entertain</u> mean in the following sentence from e selection?
It	is a great pleasure to entertain a man like you in my home!
A.	to make someone feel welcome

Christopher Columbus and John Cabot: Parallel Lives

Christopher Columbus was an important explorer. So was John Cabot.	10
The two men lived at the same time. They were almost the same age.	24
They were rivals, too. Their lives were connected in interesting ways.	35
Columbus was probably born in 1451. John Cabot may have been born	47
the same year.	50
Columbus was Italian. He was born in Genoa. Cabot was also Italian.	62
We are not sure where he was born. He may have been born in Genoa.	77
In the 1470s, Columbus worked as a sailor. He sailed to many ports in the	92
Mediterranean. During those years, Cabot worked as a merchant. He lived in	104
Venice, but he traded all around the Mediterranean.	112
Columbus spent many hours studying maps. In 1485, he came up with a	125
bold plan. He believed he could reach the Indies by sailing west.	137
Columbus set out to find a king who would pay for a voyage. He went	152
to see John II, King of Portugal. John said no. Columbus kept trying.	165
He presented his plan to other kings, including Henry VII of England.	177
Finally, he found a sponsor. King Ferdinand and Queen Isabella of Spain	189
agreed to pay for a voyage.	195
Columbus set sail in 1492. He did not make it to the Indies. He ran	210
into North America. But Columbus did not realize this. He believed he had	223
reached the Indies.	226

In 1494, Cabot learned about Columbus and his journeys. Cabot had	237
studied maps, too. He thought Columbus had made a mistake. He had sailed	250
west in the middle latitudes, near the equator. But that is where the distance	264
around Earth is greatest. Why sail there? Why take the long way? Why not	278
sail farther north? The distance around the Earth would be much shorter	290
there. It would be a better way of sailing to the Indies.	304
Cabot had an idea. He thought he could beat Columbus at his own game.	316
He drew up a plan. Then, he went looking for a sponsor, just as Columbus	331
had done.	333
Cabot looked for funding in Portugal. He was turned down. He went to	346
Henry VII of England. Henry had turned down Columbus, but he liked the	359
sound of Cabot's plan. He agreed to sponsor a voyage.	369
For the next few years, both men were busy exploring.	379
Columbus made three more voyages for Spain. He explored the Caribbean	390
Sea and the coast of South America.	397
Cabot made three voyages for England. He explored the coast of	408
North America.	410
There were many similarities between these two men. But there was one	422
big difference. Columbus ended up famous. Cabot did not. In fact, for many	435
years, Cabot was almost forgotten. Even today, historians are still digging	446
up facts about Cabot. The world has never forgotten about Christopher	457
Columbus, but it had to be reminded about John Cabot.	467

Acknowledgments

These materials are the result of the work, advice, and encouragement of numerous individuals over many years. Some of those singled out here already know the depth of our gratitude; others may be surprised to find themselves thanked publicly for help they gave quietly and generously for the sake of the enterprise alone. To helpers named and unnamed we are deeply grateful.

Contributors to Earlier Versions of These Materials

Susan B. Albaugh, Kazuko Ashizawa, Kim Berrall, Ang Blanchette, Nancy Braier, Maggie Buchanan, Paula Coyner, Kathryn M. Cummings, Michelle De Groot, Michael Donegan, Diana Espinal, Mary E. Forbes, Michael L. Ford, Sue Fulton, Carolyn Gosse, Dorrit Green, Liza Greene, Ted Hirsch, Danielle Knecht, James K. Lee, Matt Leech, Diane Henry Leipzig, Robin Luecke, Martha G. Mack, Liana Mahoney, Isabel McLean, Steve Morrison, Juliane K. Munson, Elizabeth B. Rasmussen, Ellen Sadler, Rachael L. Shaw, Sivan B. Sherman, Diane Auger Smith, Laura Tortorelli, Khara Turnbull, Miriam E. Vidaver, Michelle L. Warner, Catherine S. Whittington, Jeannette A. Williams.

We would like to extend special recognition to Program Directors Matthew Davis and Souzanne Wright, who were instrumental in the early development of this program.

Schools

We are truly grateful to the teachers, students, and administrators of the following schools for their willingness to field-test these materials and for their invaluable advice: Capitol View Elementary, Challenge Foundation Academy (IN), Community Academy Public Charter School, Lake Lure Classical Academy, Lepanto Elementary School, New Holland Core Knowledge Academy, Paramount School of Excellence, Pioneer Challenge Foundation Academy, PS 26R (the Carteret School), PS 30X (Wilton School), PS 50X (Clara Barton School), PS 96Q, PS 102X (Joseph O. Loretan), PS 104Q (the Bays Water), PS 214K (Michael Friedsam), PS 223Q (Lyndon B. Johnson School), PS 308K (Clara Cardwell), PS 333Q (Goldie Maple Academy), Sequoyah Elementary School, South Shore Charter Public School, Spartanburg Charter School, Steed Elementary School, Thomas Jefferson Classical Academy, Three Oaks Elementary, West Manor Elementary.

And a special thanks to the CKLA Pilot Coordinators, Anita Henderson, Yasmin Lugo-Hernandez, and Susan Smith, whose suggestions and day-to-day support to teachers using these materials in their classrooms were critical.
