Mini-Lessons

Log in to the digital curriculum to review all program Mini-Lessons, Extensions, and Investigations.

Unit 1: Working With Data and Solving Comparison Problems 3

1.02	Adding and Subtracting Within 10	4
1.03	Finding Number Pairs That Make 10	8
1.04	Connecting Equations and Tape Diagrams	12
1.05	Finding Missing Values in Equations Within 20	16
1.06	Exploring Strategies for Adding Within 20	20
1.07	Representing Data in an Organized Way	24
1.08	Interpreting Picture Graphs	28
1.09	Interpreting Bar Graphs	32
1.10.A	Drawing Picture Graphs	36
1.10.B	Drawing Bar Graphs	40
1.11	Answering Questions Using Graphs	44
1.12	Organizing and Representing Data	48
1.13	Writing Equations and Solving Story Problems About Data	52
1.14	Using Tape Diagrams to Represent Comparisons	56
1.15	Matching Tape Diagrams, Equations and Story Problems About Data	60
1.16	Solving Comparison Problems and Writing Equations	62

Unit 2: Adding and Subtracting Within 100 69

2.02	Identifying Coins and Their Values	70
2.03	Finding the Value of a Group of Pennies, Nickels, and Dimes	74
2.04	Finding the Value of a Group of Pennies, Nickels, Dimes, and Quarters	78
2.05	Finding Combinations of Coins That Make 1 Dollar	82
2.06	Solving Story Problems Involving Money	86
2.07	Subtracting One-Digit Numbers and Multiples of Ten From Two-Digit Numbers	90
2.08	Subtracting One-Digit Numbers From Two-Digit Numbers With Decomposing	94
2.09	Subtracting Two-Digit Numbers From Two-Digit Numbers With Decomposing	98
2.10	Subtracting by Place	102
2.11	Choosing Efficient Subtraction Strategies	106
2.12	Adding and Subtracting Within 100	110
2.13	Representing and Solving <i>Compare</i> Problems	114
2.14	Solving <i>Compare</i> , <i>Bigger Unknown</i> and <i>Smaller Unknown</i> Problems With <i>Fewer Than</i>	118
2.15	Solving <i>Compare</i> , <i>Bigger Unknown</i> and <i>Smaller Unknown</i> Problems with <i>More Than</i>	122
2.16	Solving <i>Compare</i> Story Problems With Unknowns in All Positions	126
2.17	Relating Story Problems and Tape Diagrams	130
2.18	Identifying Questions About Stories	134

continued on next page...

Mini-Lessons (continued)

Unit 2 continued

2.19	Introducing Two-Step Story Problems	138
2.20	Analyzing and Solving Two-Step Story Problems	142
2.21	Solving Two-Step Story Problems and Comparing Strategies	146
2.22	Writing Equations for Two-Step Story Problems	150

Unit 3: Measuring Length 155

3.02	Measuring the Lengths of Objects in Centimeters	156
3.03	Comparing the Lengths of Objects in Centimeters	160
3.04	Estimating the Lengths of Objects in Centimeters	164
3.05	Measuring the Lengths of Objects in Centimeters and Meters	168
3.06	Solving <i>Compare</i> Problems Involving Lengths	172
3.07	Measuring Objects in Inches	176
3.08	Estimating and Measuring Objects in Inches	180
3.09	Measuring in Inches and Feet	184
3.10	Measuring Objects Without Starting at Zero	188
3.11	Solving One-Step Story Problems Involving Lengths	192
3.12	Solving Two-Step Story Problems Involving Lengths	196
3.13	Making Sense of Data in Line Plots	200
3.14	Creating Line Plots to Represent Data	204
3.15	Answering Questions About Data Represented in Line Plots	208

Unit 4: Addition and Subtraction on the Number Line 213

4.02	Locating Points on a Number Line	214
4.03	Labeling Missing Numbers on a Number Line	218
4.04	Comparing Numbers Using a Number Line	222
4.05	Estimating Locations on a Number Line	226
4.06	Counting Forward and Back on the Number Line	230
4.07	Adding and Subtracting on the Number Line	234
4.08	Representing Equations on the Number Line	238
4.09	Representing Addition Strategies on the Number Line	242
4.10	Representing Subtraction Strategies on the Number Line	246
4.11	Solving <i>Compare</i> and <i>Take Apart</i> Story Problems on the Number Line	250
4.12	Representing One-Step Story Problems on an Open Number Line	254
4.13	Representing Two-Step Story Problems on Open Number Lines	258

Unit 5: Numbers to 1,000 263

5.02	Composing a Hundred With Tens and Ones	264
5.03	Representing Three-Digit Numbers With Tens and Hundreds	268
5.04	Composing Hundreds and Tens to Represent Three-Digit Numbers	272
5.05	Representing and Writing Three-Digit Numbers	276
5.06	Representing Three-Digit Numbers in Expanded Form	280
5.07	Identifying Number Names and Writing Numbers in Words	284
5.08	Representing Three-Digit Numbers in Different Ways	288
5.09	Comparing Three-Digit Numbers	292
5.10	Making Comparison Statements of Three-Digit Numbers True	296
5.11	Representing Comparisons on a Number Line	300
5.12	Ordering Three-Digit Numbers	304

Unit 6: Geometry and Time 309

6.02	Identifying Shapes by Name	310
6.03	Drawing Shapes	314
6.04	Drawing Shapes by Attributes	318
6.05	Drawing Shapes by Side Length	322
6.06	Measuring Three-Dimensional Shapes	326
6.07	Describing Three-Dimensional Shapes	330
6.08	Comparing Halves, Fourths, and Thirds	334
6.09	Splitting Shapes Into Halves, Fourths, and Thirds	338
6.10	Creating Equal Parts in Multiple Ways	342
6.11	Naming Parts of a Whole	346
6.12	Telling Time With Halves and Quarters	350
6.13	Telling Time by the 5-Minute	354
6.14	Strategies to Tell Time	358
6.15	Labeling Times Using a.m. or p.m.	362
6.16	Exploring Relationships Between Days, Weeks, and Months	366

Unit 7: Adding and Subtracting Within 1,000 371

7.02	Adding Tens and Hundreds to Three-Digit Numbers	372
7.03	Adding Numbers Within 1,000 Without Composing	376
7.04	Composing a Ten When Adding Within 1,000	380
7.05	Composing a Hundred When Adding Within 1,000	384
7.06	Composing a Ten and a Hundred When Adding Within 1,000	388
7.07	Adding by Place Value Using Equations	392
7.08	Using Place Value to Add Within 1,000	396
7.09	Subtracting Multiples of 10 and 100	400
7.10	Subtracting Within 1,000 Without Decomposing	404
7.11	Decomposing a Ten to Subtract Within 1,000	408
7.12	Decomposing a Hundred to Subtract Within 1,000	412
7.13	Decomposing a Ten and a Hundred to Subtract Within 500	416
7.14	Decomposing a Ten and a Hundred to Subtract Within 1,000	420
7.15	Using Place Value to Subtract Within 1,000	424
7.16	Adding Up to Four Two-Digit Numbers	428
7.17	Adding Within 1,000	432
7.18	Subtracting Within 1,000	436
7.19	Making Reasonable Estimates	440

Unit 8: Equal Groups 445

8.02	Making Two Equal Groups	446
8.03	Splitting Objects Into Pairs	450
8.04	Identifying Even and Odd Numbers	454
8.05	Justifying Even and Odd Numbers	458
8.06	Connecting Patterns and Sums of Even and Odd Numbers	462
8.07	Skip Counting With Even and Odd Numbers	466
8.08	Identifying and Describing Arrays	470
8.09	Creating Arrays	474
8.10	Representing Arrays With Equations	478
8.11	Writing Equations to Match Arrays	482
8.12	Making Rectangular Arrays With Equal-Sized Squares	486
8.13	Splitting Rectangles Into Equal-Sized Squares	490

Prerequisite Skills and Concepts	495
1.1.04 Creating and Interpreting Data Representations	496
1.1.09 Determining If Addition Equations Are True	500
1.1.10 Representing and Solving Subtraction Story Problems	504
1.1.13.A Interpreting Data Represented With Tally Marks	508
1.1.15 Selecting Which Questions Can Be Answered Using Data	512
1.2.03 Representing and Solving Story Problems With Equations	516
1.2.06 Identifying Unknowns in Story Problems	520
1.2.07 Solving Problems By Adding in Any Order	524
1.2.13 Representing and Solving Story Problems	528
1.3.02 Using Patterns to Find Sums Within 10	532
1.3.03 Using Patterns to Find Differences Within 10	536
1.3.05 Representing Teen Numbers as a Ten and Some Ones	540
1.3.14 Using Known Facts to Find Unknown Sums Within 20	544
1.4.05 Adding and Subtracting Multiples of 10	548
1.4.08 Representing Two-Digit Numbers With Tens and Ones	552
1.4.14 Comparing Two-Digit Numbers	556
1.4.18 Writing Two Different Comparison Statements About the Same Numbers	560
1.5.03 Adding Two-Digit Numbers Without Making a Ten	564
1.5.04 Finding Sums Using Equations	568
1.5.10 Adding 2 Two-Digit Numbers by Making a Ten	572
1.5.13 Adding Within 100	576
1.6.02 Ordering Lengths of Objects	580
1.6.05 Measuring Length Without Gaps or Overlaps	584
1.6.09 Representing Base-Ten Blocks Using Written Numbers	588
1.6.11 Solving <i>Compare</i> Story Problems About Length	592
1.7.04 Drawing Triangles and Rectangles	596
1.7.05 Identifying Triangles	600
1.7.14 Telling Time to the Half Hour	604
1.7.17 Describing the Time Shown on Clocks	608

Unit 1 Working With Data and Solving Comparison Problems

Sub-Unit 1: Adding and Subtracting	614
Sub-Unit 2: Ways to Represent Data	617
Sub-Unit 3: Solving Problems About Comparing	620

Unit 2 Adding and Subtracting Within 100

Sub-Unit 1: The Value of Money	623
Sub-Unit 2: Subtracting Within 100	626
Sub-Unit 3: Adding and Subtracting to Compare	629
Sub-Unit 4: Solving One- and Two-Step Story Problems	631

Unit 3 Measuring Length

Sub-Unit 1: Measuring in Standard Units	634
Sub-Unit 2: Measuring in Inches and Feet	637
Sub-Unit 3: Creating Line Plots	640

Unit 4 Addition and Subtraction on the Number Line

Sub-Unit 1: The Structure of the Number Line	643
Sub-Unit 2: Adding and Subtracting on the Number Line	646

Unit 5 Numbers to 1,000

Sub-Unit 1: The Value of Three Digits	649
Sub-Unit 2: Compare and Order Numbers Within 1,000	654

Unit 6 Geometry and Time

Sub-Unit 1: Attributes of Shapes	658
Sub-Unit 2: Halves, Thirds and Fourths	663
Sub-Unit 3: Time on the Clock	666

Unit 7 Adding and Subtracting Within 1,000

Sub-Unit 1: Adding Within 1,000 Using Place Value Strategies	670
Sub-Unit 2: Subtracting Within 1,000 Using Place Value Strategies	673
Sub-Unit 3: Choosing Strategies to Add and Subtract Within 1,000	676

Unit 8 Equal Groups

Sub-Unit 1: Odd and Even	680
Sub-Unit 2: Rectangular Arrays	684

Investigations

Course Investigations 687

Investigation 1: The Weight of Waste	688
Investigation 2: Create a Store	701
Investigation Answer Keys	715

Mini-Lessons

Unit 1

Mini-Lessons

Adding and Subtracting Within 10

ML 1.02

Modeled Review

Name: Clare

Use the patterns in the equations to fill the tables.

$4 + 1 =$	5
$4 + 2 =$	6
$4 + 3 =$	7

Guided Practice

Use the patterns in the equations to fill in the tables.

1.

$3 + 1 =$	4
$3 + 2 =$	5
$3 + 3 =$	
$3 + 4 =$	

2.

$10 - 1 =$	9
$10 - 2 =$	
$10 - 3 =$	
$10 - 4 =$	

Guided Practice

Use the patterns in the equations to fill in the tables.

3.

$4 + 1 =$	
$5 + 1 =$	
$6 + 1 =$	
$7 + 1 =$	

4.

$10 - 2 =$	
$9 - 2 =$	
$8 - 2 =$	
$7 - 2 =$	

5.

$3 + 4 =$	
$4 + 4 =$	
$5 + 4 =$	
$6 + 4 =$	

6.

$9 - 3 =$	
$8 - 3 =$	
$7 - 3 =$	
$6 - 3 =$	

Check

Use the patterns in the equations to fill in the tables.

1.

$9 - 3 =$	
$9 - 4 =$	
$9 - 5 =$	

2.

$4 + 2 =$	
$5 + 2 =$	
$6 + 2 =$	

Finding Number Pairs That Make 10

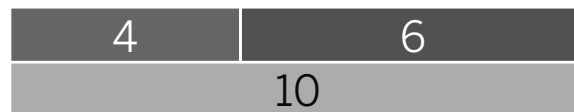

ML 1.03

Modeled Review

Name: Clare

Use the bars to complete the equation.

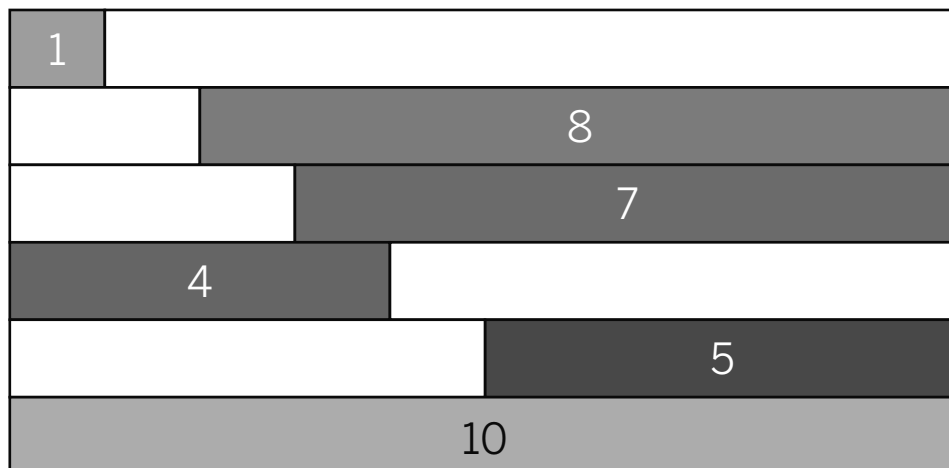

$$4 + \underline{6} = 10$$

Guided Practice

1. Make 10 by writing the missing number in each bar.

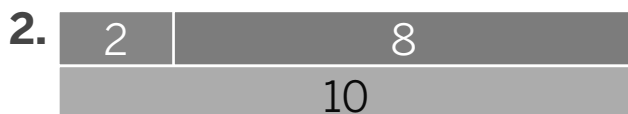

Guided Practice

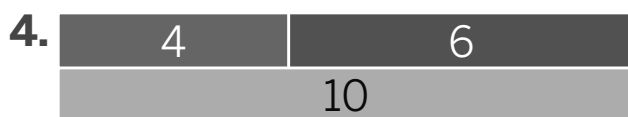

Complete the equations.

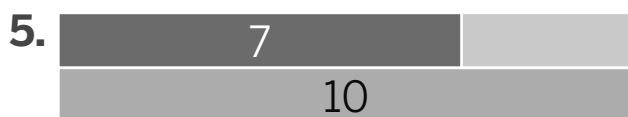

$2 + \underline{\quad} = 10$

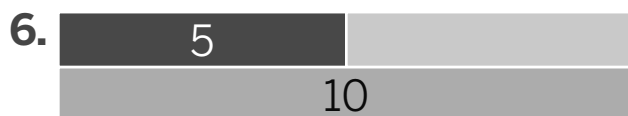

$\underline{\quad} + 9 = 10$

$\underline{\quad} + \underline{\quad} = 10$

$7 + \underline{\quad} = 10$

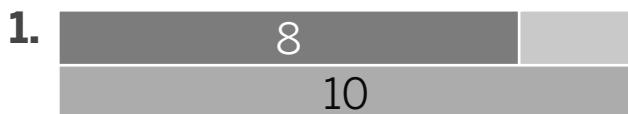

$\underline{\quad} + \underline{\quad} = 10$

Check

Complete the equations.

$\underline{\quad} + \underline{\quad} = 10$

$\underline{\quad} + \underline{\quad} = 10$

Connecting Equations and Tape Diagrams

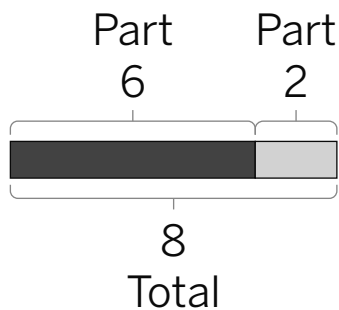

ML 1.04

Modeled Review

Name: Diego

Write an addition and subtraction equation to match the tape diagram.

$$6 + 2 = 8$$

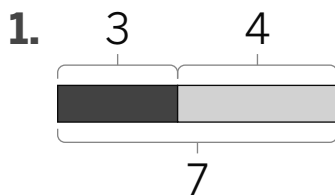

$$8 - 6 = 2$$

Guided Practice

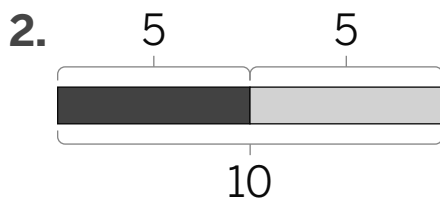

Circle two equations that match the tape diagram.

$$4 + 3 = 7$$

$$7 + 3 = 10$$

$$3 + 4 = 7$$

$$10 + 5 = 15$$

$$10 - 5 = 5$$

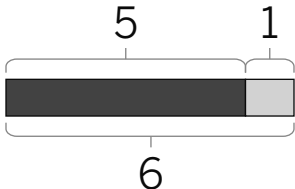

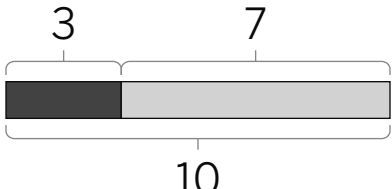

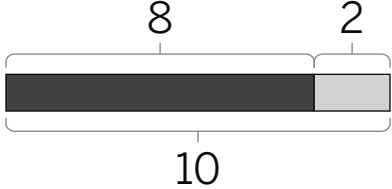

$$5 + 5 = 10$$

Guided Practice

3. Represent each tape diagram with equations.

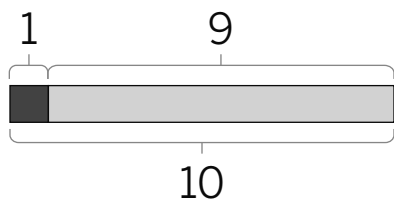

Tape diagram	Equations
	$5 + 1 = 6$ $1 + \underline{\quad} = 6$ $6 - 5 = 1$ $6 - \underline{\quad} = 5$
	$\underline{\quad} + \underline{\quad} = 10$ $\underline{\quad} + \underline{\quad} = 10$ $10 - \underline{\quad} = \underline{\quad}$ $10 - \underline{\quad} = \underline{\quad}$
	

Check

Represent the tape diagram with one addition and one subtraction equation.

Finding Missing Values in Equations Within 20

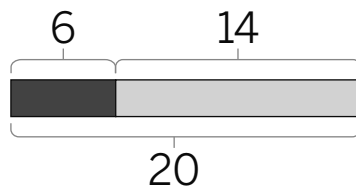

ML 1.05

Modeled Review

Name: Han

Complete the equation to match the tape diagram.

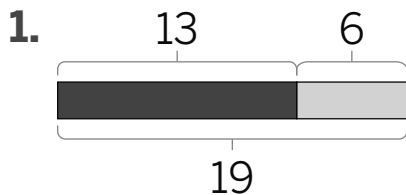

$$20 - \underline{6} = 14$$

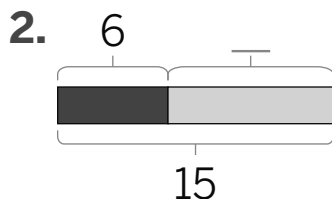

Guided Practice

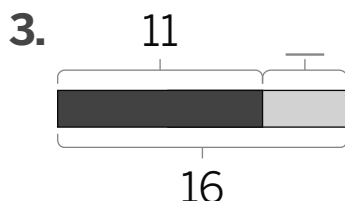

Find the number that makes each equation true. Use the tape diagram if it is helpful.

$$19 - \underline{\quad} = 13$$

$$15 - \underline{\quad} = 6$$

$$11 + \underline{\quad} = 16$$

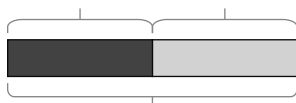

Guided Practice

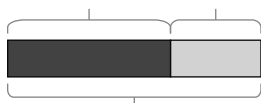

Find the number that makes each equation true. Use the tape diagram if it is helpful.

4.

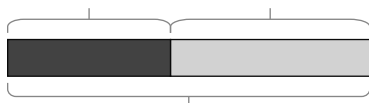

$$16 - \underline{\quad} = 8$$

5.

$$9 + \underline{\quad} = 14$$

6.

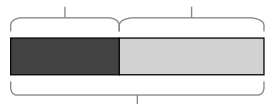

$$20 - \underline{\quad} = 11$$

Check

Find the number that makes the equation true. Use the tape diagram if it is helpful.

$$14 - \underline{\quad} = 8$$

Exploring Strategies for Adding Within 20

ML 1.06

Modeled Review

Name: Diego

Find the value of the equation by composing a 10.

$$9 + 5 = \underline{14}$$

$$9 + 1 = 10$$

$$10 + 4 = 14$$

I know $4 + 1 = 5$ so
I added the 1 to 9 to
make 10. I had 4 left
over so I added 4 and
10 to make 14.

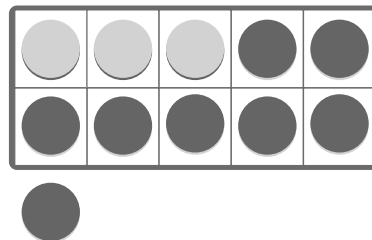

Guided Practice

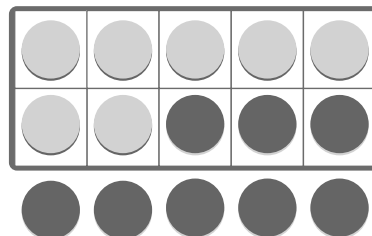

Find the value of each equation. Use the 10-frame if it is helpful.

1. $3 + 8 = \underline{\quad}$

2. $7 + 8 = \underline{\quad}$

Guided Practice

3. Find the value of the equation. Show or explain your thinking.

Equation	Workspace
$12 + 8 = \underline{\quad}$	
$9 + 7 = \underline{\quad}$	
$13 + 7 = \underline{\quad}$	
$14 + 3 = \underline{\quad}$	

Check

- Find the value of the equation. Show or explain your thinking.

Equation	Workspace
$15 + 3 = \underline{\quad}$	

Representing Data in an Organized Way

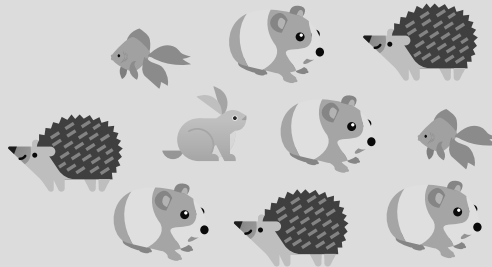

ML 1.07

Modeled Review

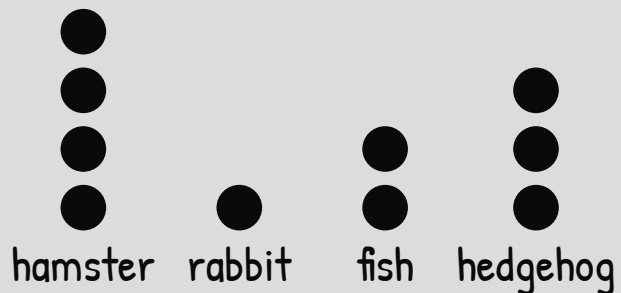

Students voted on their preferred class pet. Han and Diego represented the data in two different ways.

Han's Work
Favorite Class Pet

hamster ● ● ● ●	rabbit ●
fish ● ●	hedgehog ● ● ●

Diego's Work
Favorite Class Pet

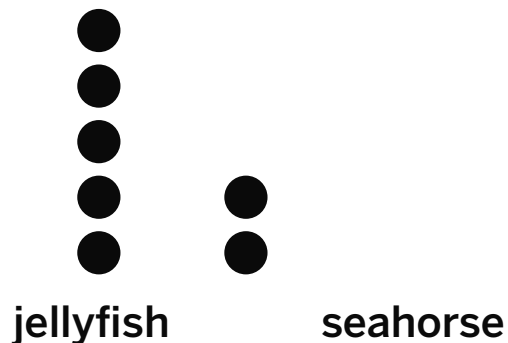

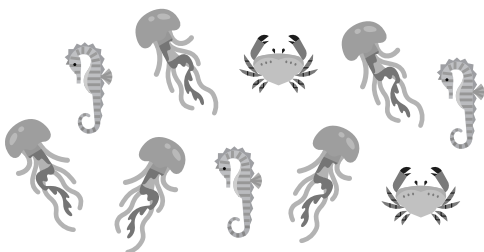

Guided Practice

- Write the missing label for the center column. Then draw dots to show the number of votes for seahorse.

Favorite Aquarium Animal

Guided Practice

2. Students voted on their favorite sport. Create a representation of the data.

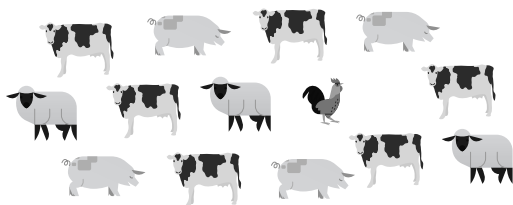

Check

- Students voted on their favorite farm animal. Create a representation of the data.

Interpreting Picture Graphs

ML 1.08

Modeled Review

Name: Jada

The picture graph shows some students' favorite type of pet. Use the picture graph for Problems 1 and 2.

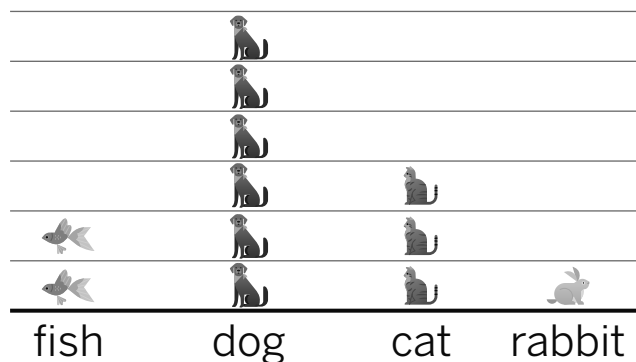

1. How many students voted for fish or cat?

5 students

2. How many *more* students voted for dog than fish?

4 students

Votes for Favorite Pet

Guided Practice

The picture graph shows some students' favorite vegetable.

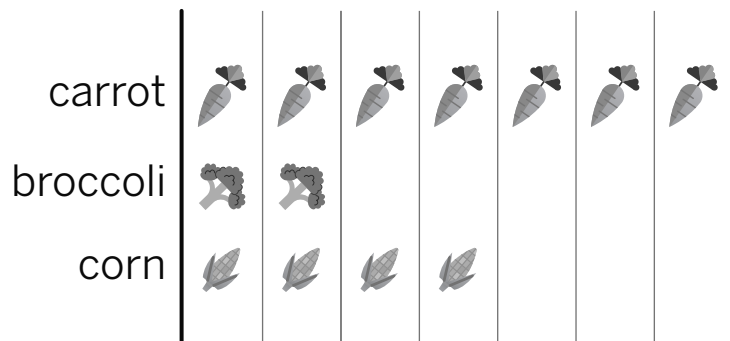

1. How many students chose each vegetable?

carrot: 7 students

broccoli: _____

corn: _____

Votes for Favorite Vegetable

Guided Practice

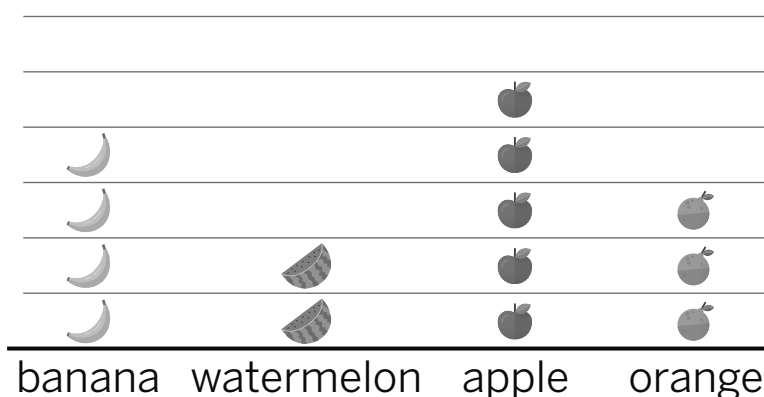

The picture graph shows some students' favorite type of fruit. Use the picture graph for Problems 2–4.

2. How many students voted for apple or orange?

3. How many *more* students voted for banana than watermelon?

4. How many students voted altogether?

Votes for Favorite Fruit

Check

The picture graph shows some students' favorite sport. Use the picture graph for Problems 1 and 2.

1. How many students voted for soccer or baseball?

2. How many *more* students voted for basketball than football?

Votes for Favorite Sport

Interpreting Bar Graphs

ML 1.09

Modeled Review

Name: Clare

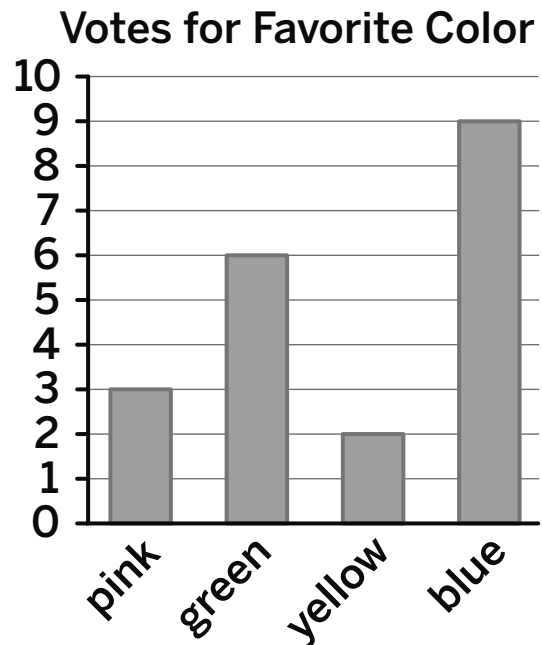

Students voted for their favorite color. Use the data displayed on the bar graph to answer Problems 1 and 2.

1. How many students voted for green or yellow?

8 students

2. How many *more* students voted for blue than pink?

6 students

Guided Practice

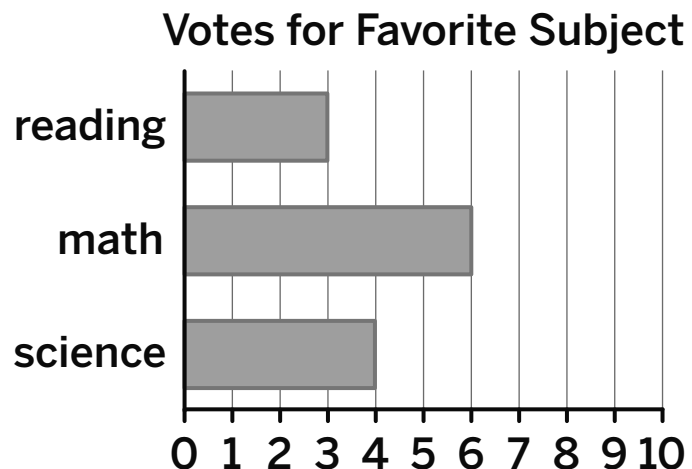

The bar graph shows students' favorite subject in school.

1. How many students chose each subject?

reading: 3 students

math: _____

science: _____

Guided Practice

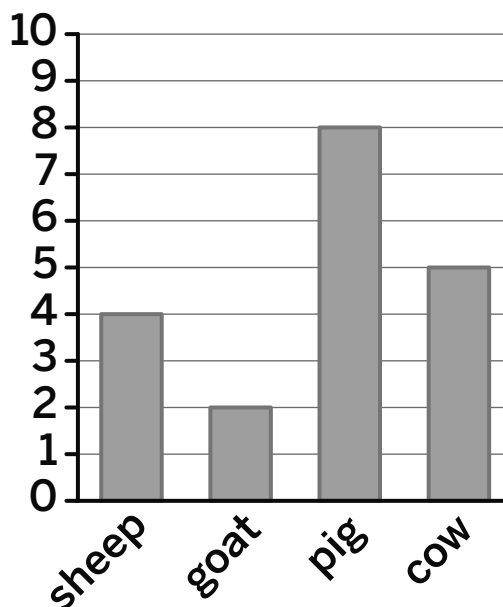

The bar graph shows some students' favorite farm animal. Use the bar graph for Problems 2–4.

2. How many students voted for sheep or pig?

3. How many *more* students voted for cow than goat?

4. How many students voted in total?

Votes for Favorite Farm Animal

Check

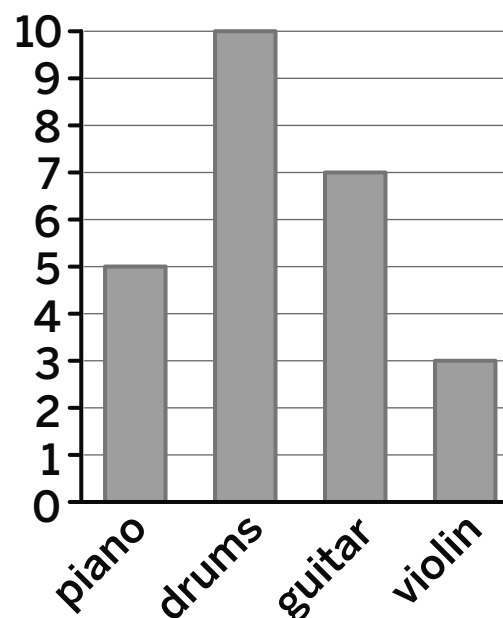

The bar graph shows some students' favorite instrument. Use the bar graph for Problems 1 and 2.

1. How many students voted for guitar or piano?

2. How many *more* students voted for drums than violin?

Votes for Favorite Instrument

Drawing Picture Graphs

ML 1.10.A

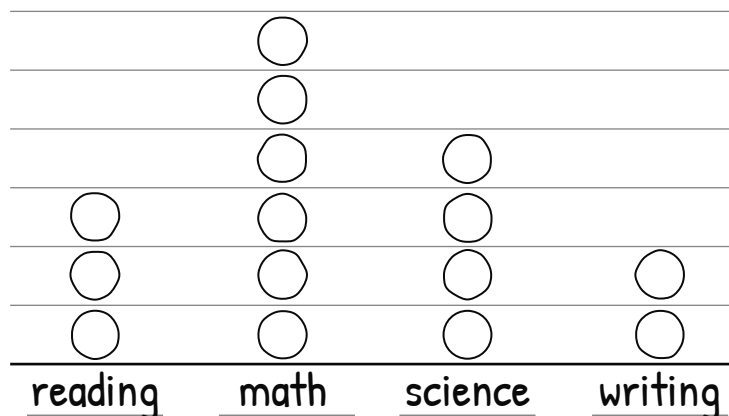

Modeled Review

Name: Dylan

Use the data from the table to complete the picture graph.

Votes for Favorite Subject

Favorite Subject	
reading	3
math	6
science	4
writing	2

Guided Practice

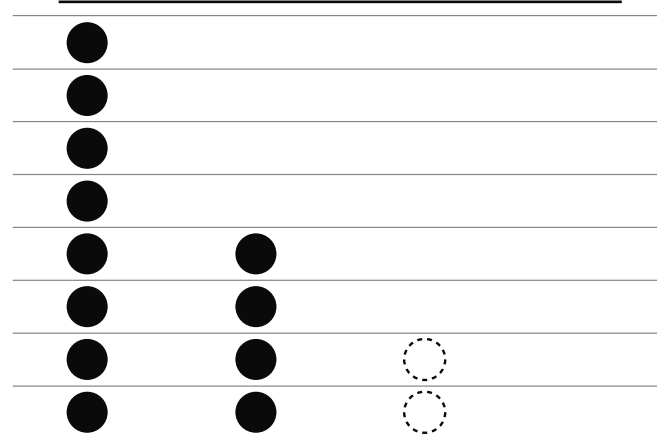

1. Use the data from the table to complete the picture graph.

Favorite Season

summer	8
fall	4
winter	2
spring	5

Votes for Favorite Season

summer _____ winter _____

Guided Practice

2. Create a picture graph to represent the data in the table.

Favorite Fruit	
banana	4
apple	7
orange	3
peach	2

Check

Create a picture graph to represent the data in the table.

Favorite Color	
blue	5
yellow	3
green	8
red	6

Drawing Bar Graphs

ML 1.10.B

Modeled Review

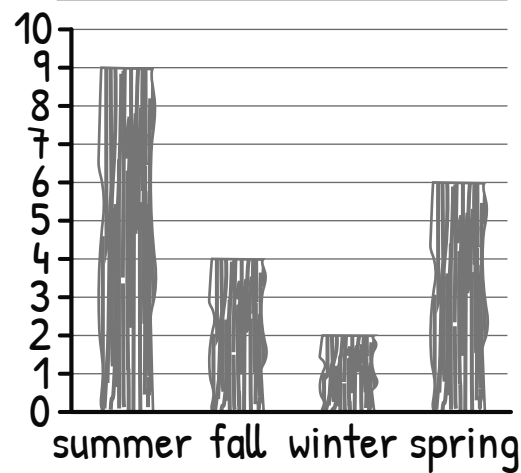

Use the data from the table to complete the bar graph.

Favorite Season	
summer	9
fall	4
winter	2
spring	6

Name: Santiago

Votes for Favorite Season

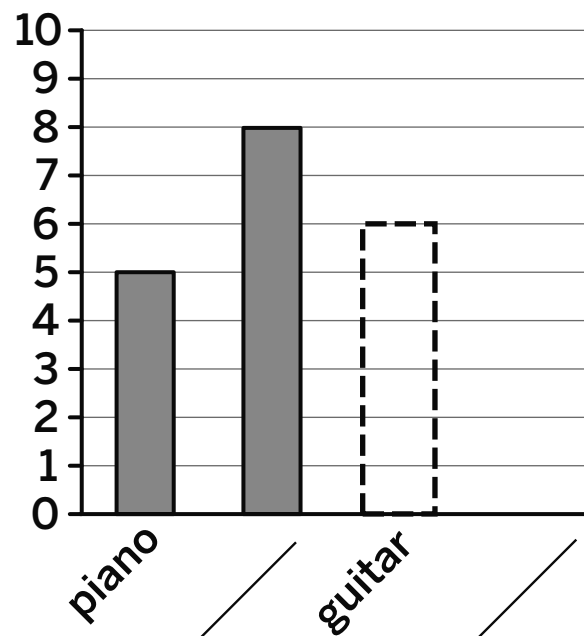

Guided Practice

1. Use the data from the table to complete the bar graph.

Favorite Instrument	
piano	5
drums	8
guitar	6
violin	3

Votes for Favorite Instrument

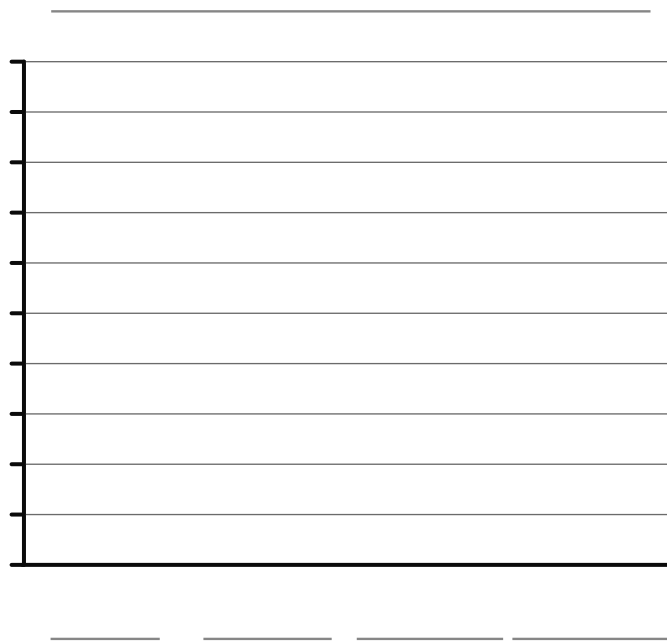

Guided Practice

2. Create a bar graph to represent the data in the table.

Favorite Color	
red	4
blue	6
green	10
yellow	3

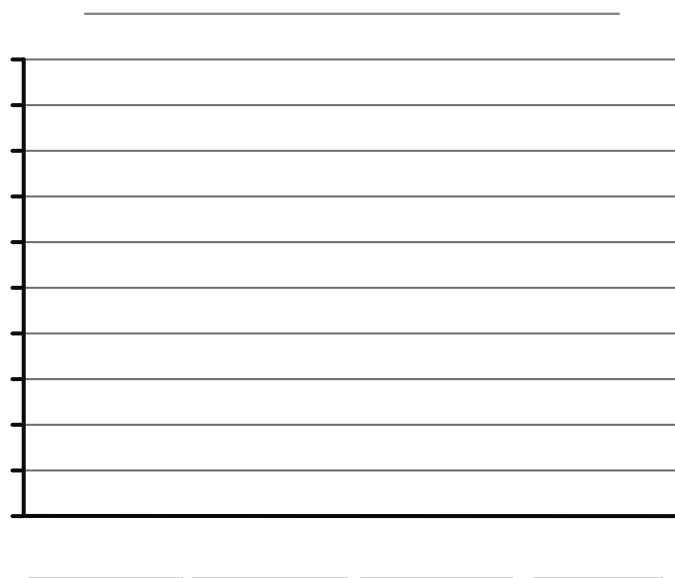

Check

Create a bar graph to represent the data in the table.

Favorite Fruit	
mango	5
orange	7
peach	2
apple	9

Answering Questions Using Graphs

ML 1.11

Modeled Review

Name: Priya

The bar graph shows some students' favorite subject in school.

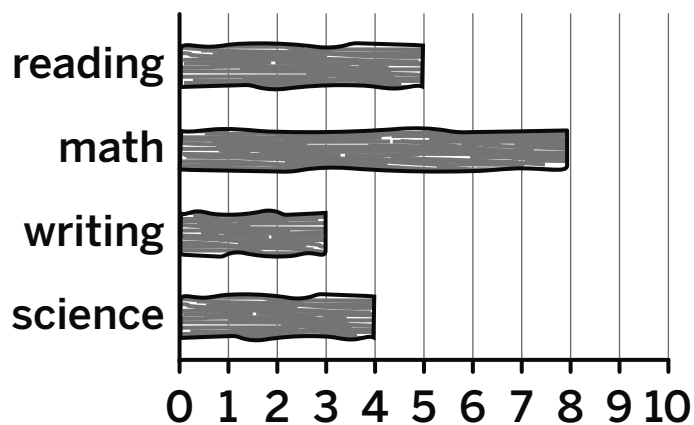

1. How many *fewer* students voted for reading than math?

3 students

2. How many students voted for writing or science?

7 students

Votes for Favorite Subject

Guided Practice

The picture graph shows some students' favorite flower.

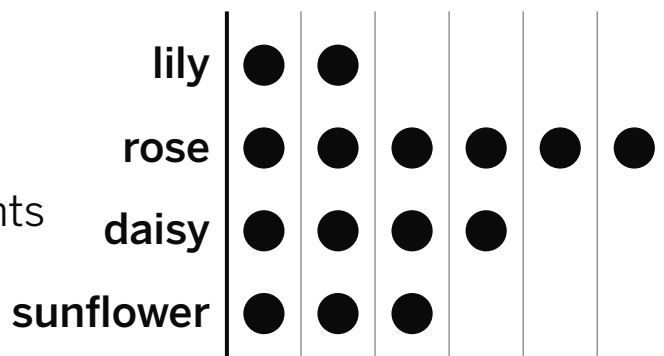

1. How many *fewer* students chose lily than rose?

 students

2. How many *more* students chose rose than daisy?

 students

Votes for Favorite Flower

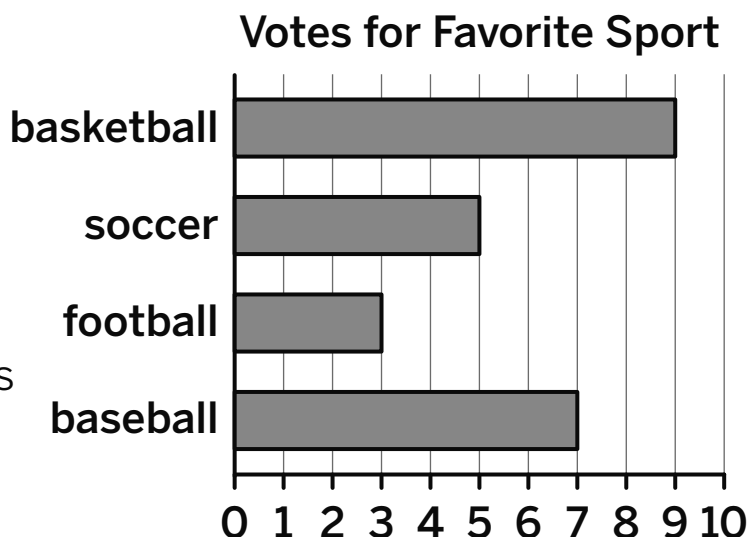

Guided Practice

The bar graph shows some students' favorite sport.

3. How many *more* students voted for basketball than soccer?
- _____

4. How many students voted for football or baseball?
- _____

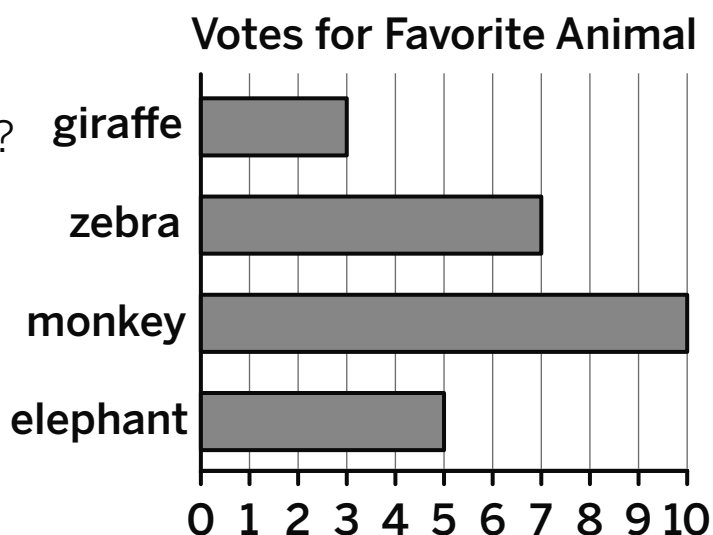

Check

The bar graph shows some students' favorite animal.

1. How many *fewer* students voted for giraffe than elephant?
- _____

2. How many students voted for zebra or monkey?
- _____

Organizing and Representing Data

ML 1.12

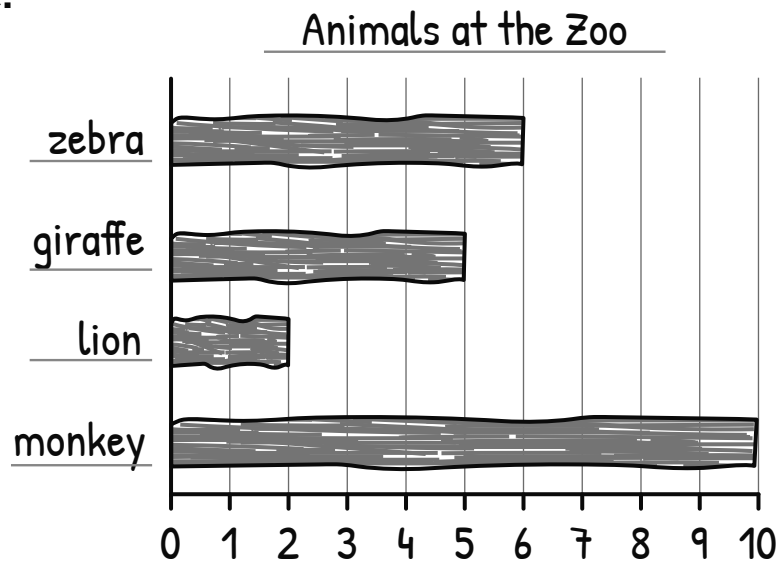

Modeled Review

Name: Shawn

Create a bar graph or picture graph to represent the data in the table.

Animals at the Zoo	
zebra	6
giraffe	5
lion	2
monkey	10

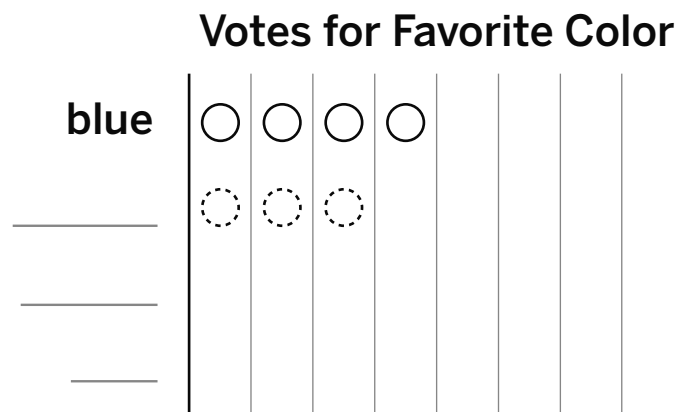

Guided Practice

- The picture graph shows some students' favorite color. Use the data from the table to complete the picture graph.

Favorite Color	
blue	4
yellow	3
green	8
red	5

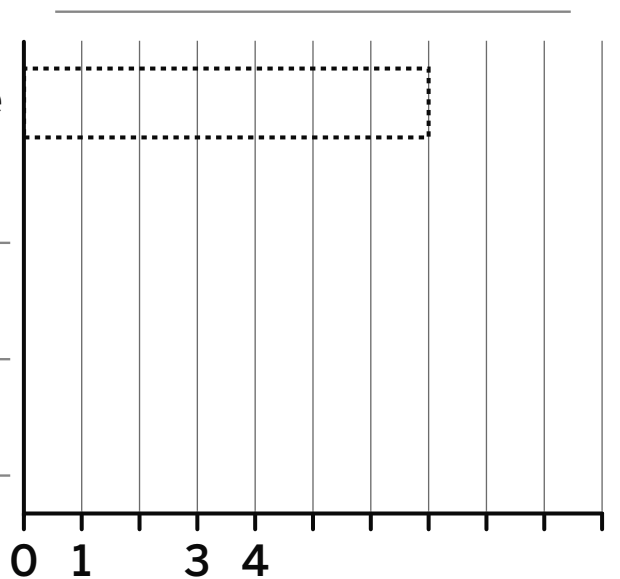

Guided Practice

2. The bar graph shows some students' favorite type of fruit. Use the data from the table to complete the bar graph.

Favorite Fruit	
apple	7
orange	9
mango	2
peach	4

apple

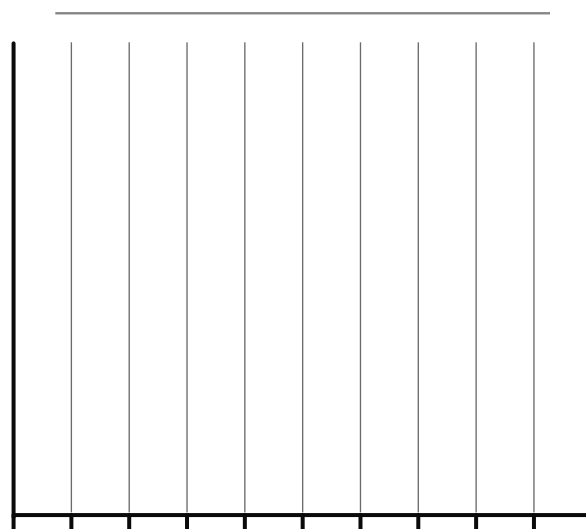

Check

Create a bar graph to represent the data in the table.

Favorite Pet	
dog	10
cat	7
fish	3
rabbit	6

Writing Equations and Solving Story Problems About Data

ML 1.13

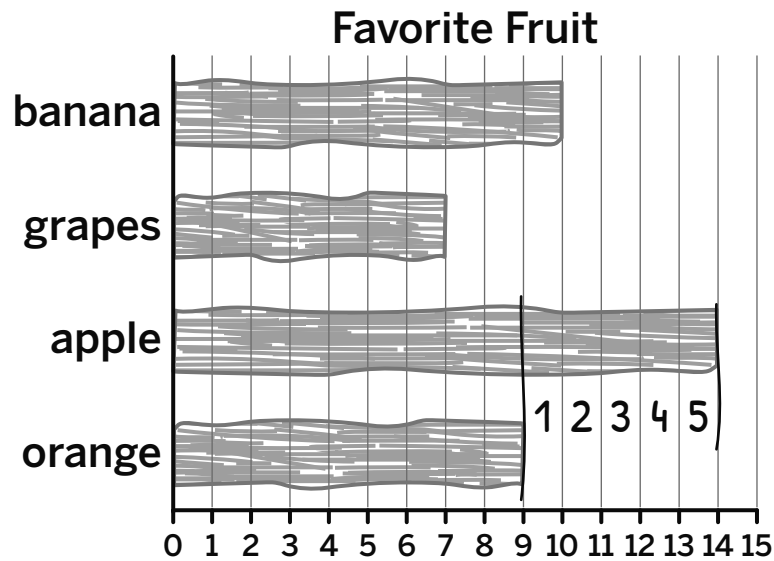

Modeled Review

Name: Tristan

The bar graph shows students' favorite types of fruit.

How many *fewer* students voted for orange than apple? Write an equation then underline the answer.

$$\underline{9 + 5 = 14}$$

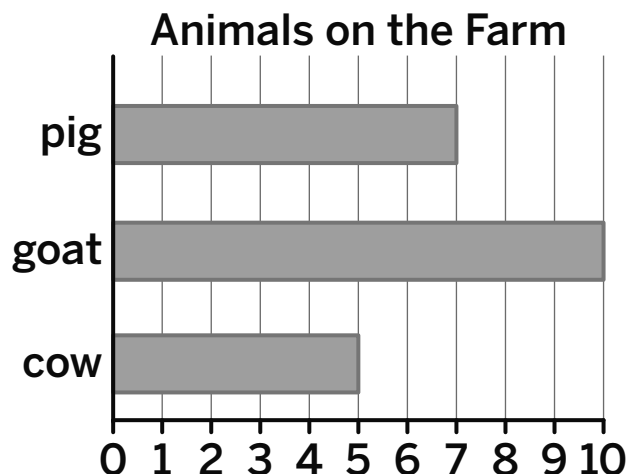

Guided Practice

Use the information in the bar graph to answer each question. Write an equation to show your thinking.

1. How many *more* pigs than cows are on the farm?
- _____

2. How many *fewer* cows than goats are on the farm?
- _____

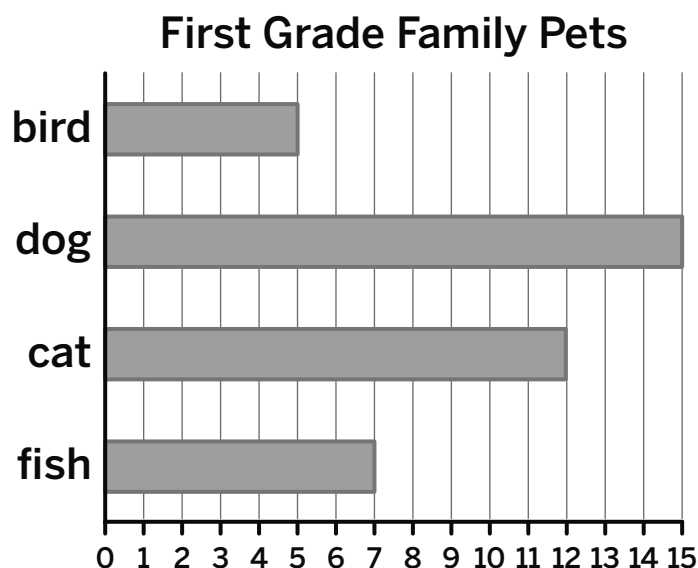

Guided Practice

Use the information in the bar graph to answer each question. Write an equation then underline the answer.

3. How many *more* students have dogs than fish?

4. How many *fewer* students have birds than cats?

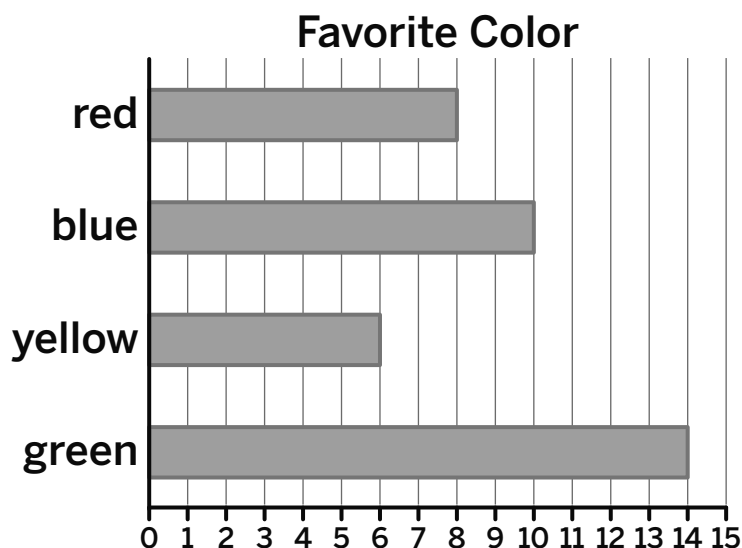

Check

The bar graph shows some students' favorite colors.

How many *fewer* students voted for yellow than blue?
Write an equation then underline the answer.

Using Tape Diagrams to Represent Comparisons

ML 1.14

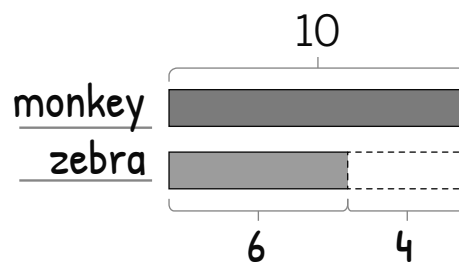

Modeled Review

Name: Maya

Complete the tape diagram using the comparison statement.

There are 4 *fewer* zebras than monkeys.

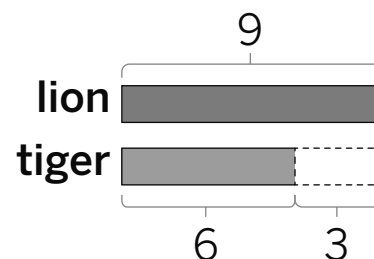

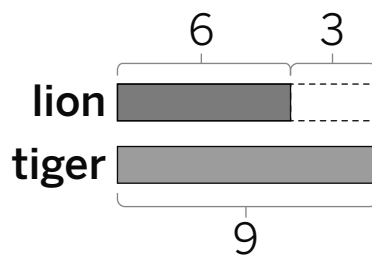

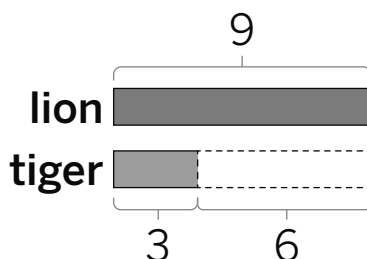

Guided Practice

Circle the tape diagram that represents the comparison statement.

1. There are 3 *more* lions than tigers.

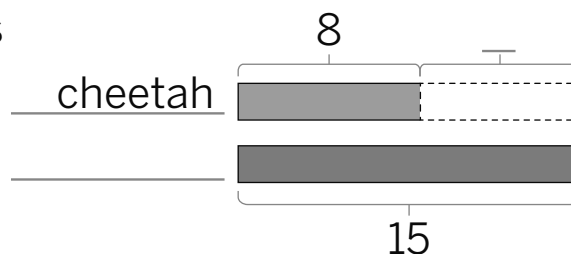

Guided Practice

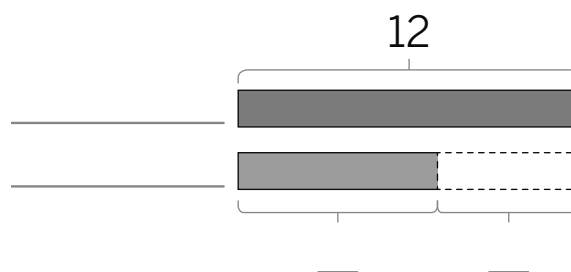

Complete the tape diagrams using the comparison statements.

2. There are 7 *fewer* cheetahs than flamingos.

3. There are 5 *more* elephants than giraffes.

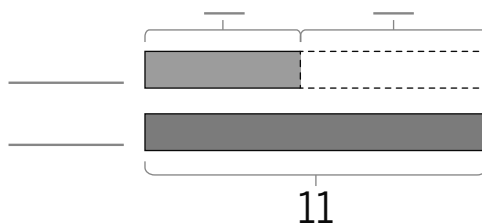

Check

Complete the tape diagram using the comparison statement.

There are 6 *fewer* bears than foxes.

Matching Tape Diagrams, Equations, and Story Problems About Data

ML 1.15

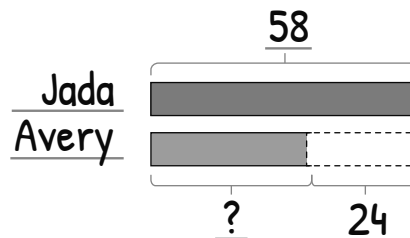

Modeled Review

Name: Shawn

Jada has 58 stamps. Avery has 24 *fewer* stamps than Jada.

1. Use the story problem to fill in the diagram.

2. Write two equations that match the story problem and tape diagram. Use a ? symbol to represent the unknown number of stamps.

equation 1: $? + 24 = 58$

equation 2: $58 - 24 = ?$

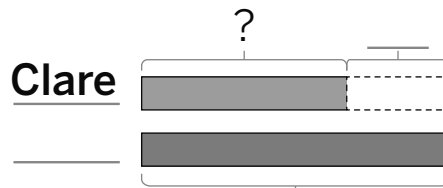

Guided Practice

Eva has 45 stickers. Clare has 15 *fewer* stickers than Eva.

1. Use the story problem to fill in the diagram.

2. Complete the equation that matches the story problem and tape diagram.

equation: $? + 15 = \underline{\quad}$

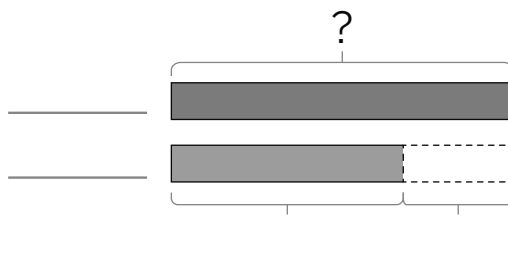

Guided Practice

Jack has 23 toy cars. Dylan has 11 *more* toy cars than Jack.

3. Use the story problem to fill in the diagram.

4. Write an equation that matches the story problem and tape diagram. Use a ? symbol to represent the unknown number of toy cars.

equation: _____

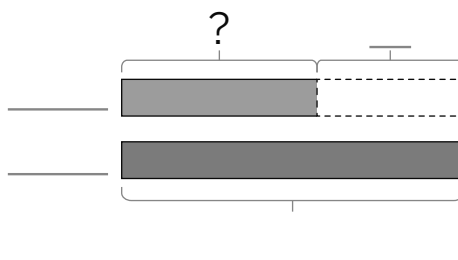

Check

Kai has 38 marbles. Han has 17 *fewer* marbles than Kai.

1. Use the story problem to fill in the diagram.

2. Write an equation that matches the story problem and tape diagram. Use a ? symbol to represent the unknown number of marbles.

equation: _____

Solving Comparison Problems and Writing Equations

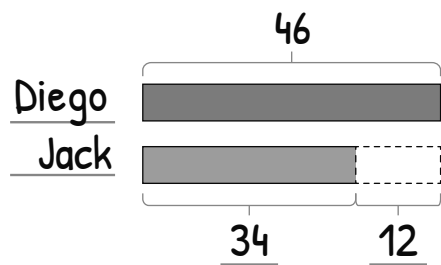

ML 1.16

Modeled Review

Name: Priya

Jack collected 34 rocks. Diego collected 12 *more* rocks than Jack. How many rocks did Diego collect? Complete the tape diagram.

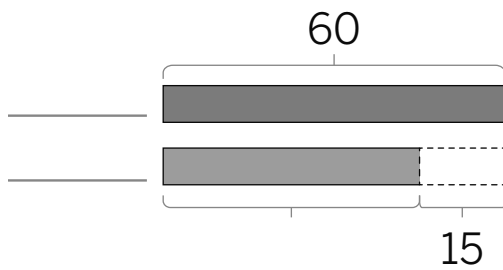

$$\begin{aligned}
 &34 + 12 \\
 &34 + 10 = 44 \\
 &44 + 2 = 46
 \end{aligned}$$

Guided Practice

- Han has 60 marbles. Maya has 15 *fewer* marbles than Han. How many marbles does Maya have? Use the story problem to fill in the tape diagram.

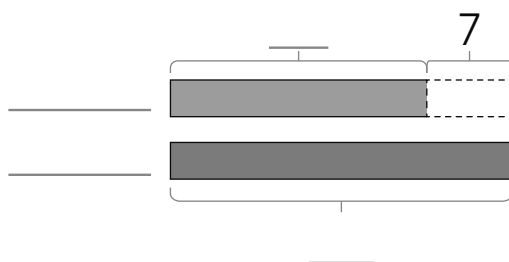

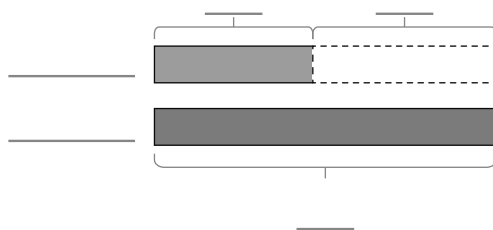

Guided Practice

2. Clare found 7 *more* shells than Avery. Avery found 21 shells. How many shells did Clare find? Use the story problem to fill in the tape diagram.

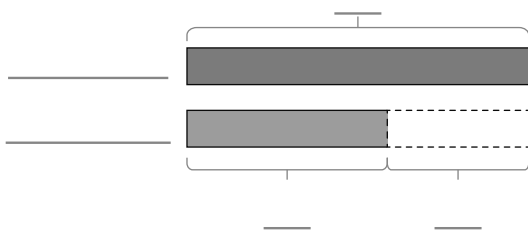

3. Eva has 35 *fewer* stickers than Jada. Jada has 65 stickers. How many stickers does Eva have? Use the story problem to fill in the tape diagram.

Check

Tristan has 23 *fewer* trading cards than Dylan. Dylan has 56 trading cards. How many trading cards does Tristan have? Use the story problem to fill in the tape diagram.

Unit 2

Mini-Lessons

Identifying Coins and Their Values

ML 2.02

Modeled Review

Name: Maya

Write the name of the coins and the total value.

name: nickelsvalue: 35¢

Guided Practice

1. Use the word bank to complete the table.

penny	nickel	dime
1¢	5¢	10¢

Front	Back	Name	Value
		dime	
			1¢
			

Guided Practice

2. Write the name of the coins and the total value.

Coins	Name	Value
10 20 30 40 50 	dimes	
		25¢
		
		

Check

Write the name of the coins and the total value.

Estimate the length of the marker in centimeters.

I think the length of the marker is about 10 centimeters.

Guided Practice

1. Draw lines to match the real-world object to its estimated length.

2 centimeters

50 centimeters

15 centimeters

Guided Practice

2. Estimate the length of each object in centimeters. Record each estimate.

Object	Estimate (centimeters)
eraser	
crayon	
pencil	
paper clip	
highlighter	

Check

Estimate the length of the glue stick in centimeters.

I think the length of the glue stick is about _____.

Measuring the Lengths of Objects in Centimeters and Meters

ML 3.05

Modeled Review

Name: Diego

Use a meter stick to
measure the length of an
object in your classroom.

object: tablelength: 2 meters and
8 centimeters

It is two meter sticks long
and 8 more so it's two
meters and 8 centimeters.

Name: Eva

Use a meter stick to
measure the length of an
object in your classroom.

object: tablelength: 208 centimeters

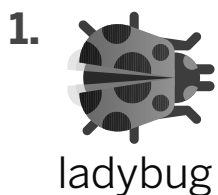

It is two meter sticks
long and 8 more so it's
 $100 + 100 + 8$ centimeters.

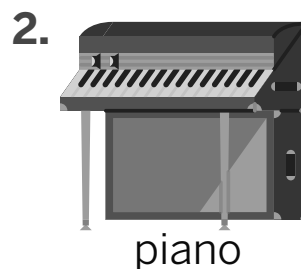

Guided Practice

Select the unit that would be *more* useful for measuring
the length of each real-world object.

meters

Guided Practice

1. Write the three-digit number in standard form. Use the table to help you organize the digits.

Amount of each unit	Hundreds	Tens	Ones	Standard form
2 ones, 7 tens, and 6 hundreds	6	7	2	
8 tens, 2 hundreds, and 6 ones	2	8		
5 hundreds, 7 tens, and 3 ones				
4 hundreds, 5 ones, and 2 tens				

Guided Practice

2. Write the three-digit number in standard form. Use the table to help you organize the digits.

Amount of each unit	Hundreds	Tens	Ones	Standard form
7 hundreds, 15 tens, and 4 ones	7	15	4	
11 tens, 2 hundreds, and 8 ones	2	11		
12 ones, 3 tens, and 6 hundreds	6	3		
5 hundreds, 17 tens, and 3 ones				
4 hundreds, 15 ones, and 2 tens				
7 ones, 14 tens, and 6 hundreds				

Check

For Problems 1–2, write the number in standard form.

1. 2 hundreds 3 tens 15 ones _____

2. 6 ones 2 hundreds 17 tens _____

Representing Three-Digit Numbers in Expanded Form

ML 5.06

Modeled Review

Name: Diego

1. Represent the number 483 in expanded form.

$$\underline{400 + 80 + 3}$$

2. Represent the number 267 in expanded form.

$$\underline{200 + 60 + 7}$$

Guided Practice

1. Fill in the table with the missing representations.

Base-ten diagram	Standard form	Expanded form
	254	$200 + 50 + \underline{\quad}$
	526	$500 + \underline{\quad} + \underline{\quad}$
	367	$\underline{\quad} + \underline{\quad} + \underline{\quad}$
	683	

Guided Practice

2. Represent each number in expanded form.

Standard form	Expanded form
472	$400 + 70 + \underline{\hspace{2cm}}$
319	$300 + \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$
745	$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$
583	
827	

Check

1. Represent the number 376 in expanded form.

2. Represent the number 658 in expanded form.

Identifying Number Names and Writing Numbers in Words

ML 5.07

Modeled Review

Name: Clare

1. Write the number 743 in words.

seven hundred forty-three

2. Write the number five hundred twenty-eight in standard form.

528

3. Write the value of the expression $300 + 60 + 6$ in words.

three hundred sixty-six

Guided Practice

1. Draw a line to match the word form with the correct standard form.

two hundred forty	139
four hundred fifty-three	718
three hundred twenty-seven	684
one hundred thirty-nine	240
six hundred eighty-four	327
seven hundred eighteen	453

Guided Practice

2. Write the three-digit number in standard form and words.

Expanded form	Standard form	Words
$500 + 80 + 5$	585	five hundred eighty-five
$400 + 70 + 2$		four hundred seventy-two
$600 + 20 + 8$		six hundred twenty-eight
$700 + 30 + 4$	734	
$200 + 90 + 7$	297	
$300 + 50 + 9$		
$800 + 40 + 3$		

Check

1. Write the number 851 in words.

2. Write the number four hundred fifty-one in standard form.

3. Write the value of the expression $600 + 40 + 3$ in words.

Representing Three-Digit Numbers in Different Ways

ML 5.08

Modeled Review

Name: Priya

Write the three-digit number in standard form, expanded form, and words.

Base-ten diagram	Standard form	Expanded form	Words
	483	$400 + 80 + 3$	four hundred eighty-three

Guided Practice

For Problems 1–2, circle *two* ways to represent the number.

1. 632

$60 + 2 + 300$

six hundred thirty-two

6 tens, 3 hundreds, 2 ones

$600 + 30 + 2$

2. 358

three hundred eighty-five

$500 + 30 + 8$

$50 + 8 + 300$

8 ones, 5 tens, 3 hundreds

Guided Practice

3. Write each three-digit number in standard form, expanded form, and words.

Base-ten diagram	Standard form	Expanded form	Words
	495	$400 + 90 + \underline{\quad}$	four hundred ninety-five
		$600 + \underline{\quad} + \underline{\quad}$	six hundred fifty-two
	379	$\underline{\quad} + \underline{\quad} + \underline{\quad}$	

Check

- Write each three-digit number in standard form, expanded form, and words.

Base-ten diagram	Standard form	Expanded form	Words
	253		
			five hundred twenty-six

Comparing Three-Digit Numbers

ML 5.09

Modeled Review

Name: Tristan

Compare the values. Write $>$, $<$, or $=$ to make the comparison statement true.

$$\begin{array}{ccc} 642 & > & 625 \\ \downarrow & & \downarrow \\ 4 \text{ tens} & & 2 \text{ tens} \end{array}$$

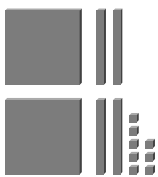

Guided Practice

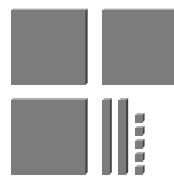

Write the number of hundreds, tens, and ones that are in each number. Then write $>$, $<$, or $=$ to make the comparison statement true.

1. $248 \quad \underline{\hspace{1cm}} \quad 243$

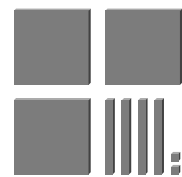

2 hundreds 2 hundreds
4 tens 4 tens
___ ones ___ ones

2. $325 \quad \underline{\hspace{1cm}} \quad 342$

3 hundreds 3 hundreds
___ tens ___ tens
___ ones ___ ones

3. $563 \quad \underline{\hspace{1cm}} \quad 627$

___ hundreds ___ hundreds
___ tens ___ tens
___ ones ___ ones

4. $845 \quad \underline{\hspace{1cm}} \quad 845$

___ hundreds ___ hundreds
___ tens ___ tens
___ ones ___ ones

Guided Practice

Compare the values. Write $>$, $<$, or $=$ to make the comparison statement true.

5. 334 ____ 258

6. 487 ____ 562

7. 634 ____ 651

8. 839 ____ 834

9. 285 ____ 285

10. 732 ____ 719

11. 964 ____ 984

Check

Compare the values. Write $>$, $<$, or $=$ to make the comparison statement true.

1. 548 ____ 485

2. 612 ____ 612

3. 327 ____ 362

4. 958 ____ 954

Making Comparison Statements of Three-Digit Numbers True

ML 5.10

Modeled Review

Name: Avery

Use the numbers from the number bank to make each comparison statement true. Use each number only once.

483

265

624

1. 624 > 532

2. 376 < 483

3. 265 < 326

I used 624 first because that was the only number greater than 532.

Guided Practice

Use the numbers from the number bank to make each comparison statement true. Use each number only once.

734

518

465

1. 518 < 672

2. 496 > _____

3. _____ > 571

Guided Practice

Use the numbers from the number bank to make each comparison statement true. Use each number only once.

397

286

652

574

4. $317 > \underline{\hspace{2cm}}$

5. $\underline{\hspace{2cm}} > 329$

6. $623 < \underline{\hspace{2cm}}$

7. $\underline{\hspace{2cm}} < 638$

Check

Use the numbers from the number bank to make each comparison statement true. Use each number only once.

784

462

843

519

1. $\underline{\hspace{2cm}} > 796$

2. $428 < \underline{\hspace{2cm}}$

3. $\underline{\hspace{2cm}} < 816$

4. $627 > \underline{\hspace{2cm}}$

Representing Comparisons on a Number Line

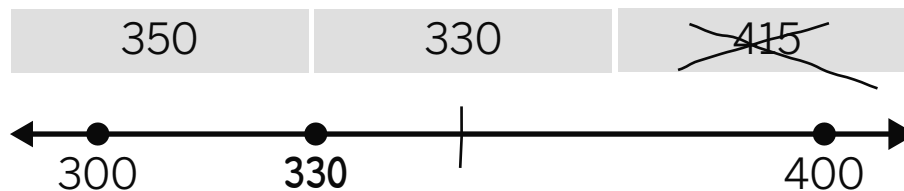

ML 5.11

Modeled Review

Name: Dylan

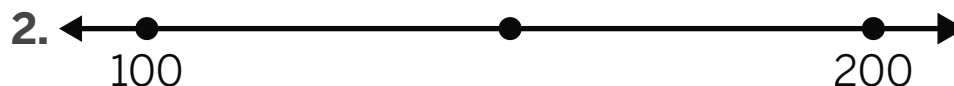

Label the unlabeled point with a possible number based on its location on the number line.

Guided Practice

Label the unlabeled point with a possible number based on its location on the number line.

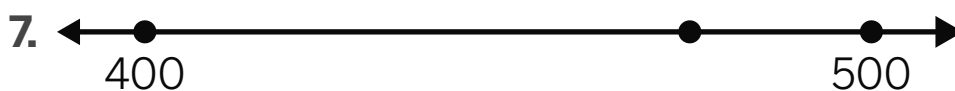

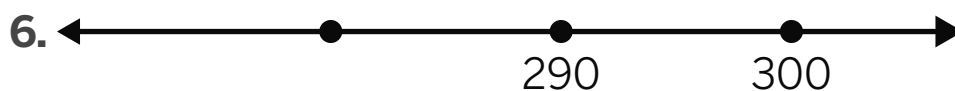

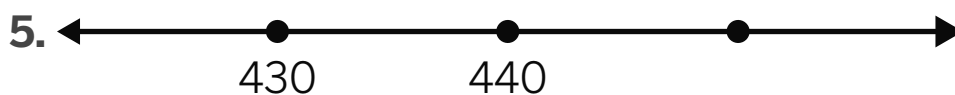

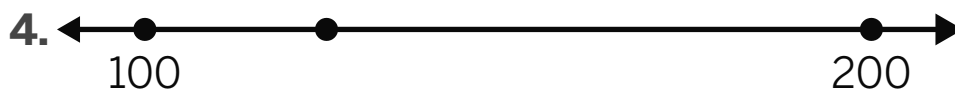

Guided Practice

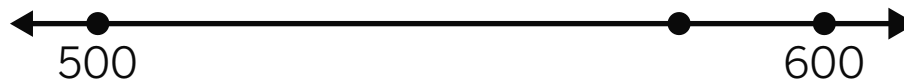

Label the unlabeled point with a possible number based on its location on the number line.

Check

Label the unlabeled point with a possible number based on its location on the number line.

Ordering Three-Digit Numbers

ML 5.12

Modeled Review

Name: Han

Record the numbers in order from *least* to *greatest*.

652	639	683	634
634	639	652	683
least			greatest

Guided Practice

Record the numbers in order from *least* to *greatest*.

Unit 6

Mini-Lessons

Identifying Shapes by Name

ML 6.02

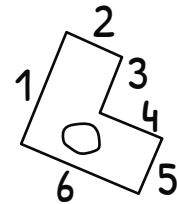

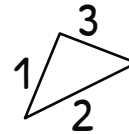

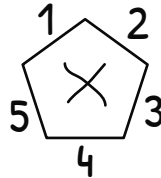

Modeled Review

Name: Santiago

For Problems 1–2,
use the following shapes.

1. Put an **X** on the pentagon.

2. Put an **O** on the hexagon.

Guided Practice

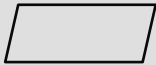

Use the word bank to complete Problems 1–3.

triangle

3 sides,
3 corners

quadrilateral

4 sides,
4 corners

pentagon

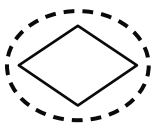

5 sides,
5 corners

hexagon

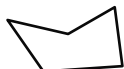

6 sides,
6 corners

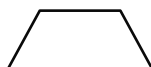

1. Circle *all* the quadrilaterals.

2. Circle *all* the pentagons.

3. Circle *all* the hexagons.

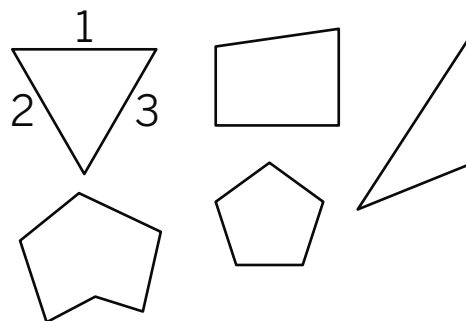

Guided Practice

Use the following shapes for Problems 4–5.

4. Put an **X** on *all* the triangles.

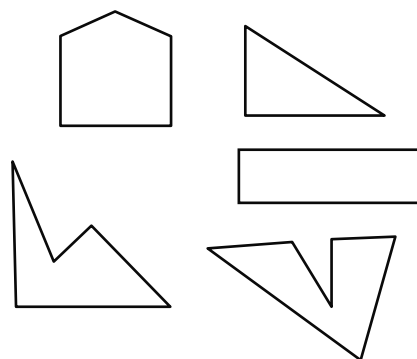

5. Put an **O** on *all* the hexagons.

Use the following shapes for Problems 6–7.

6. Put an **X** on *all* the quadrilaterals.

7. Put an **O** on *all* the pentagons.

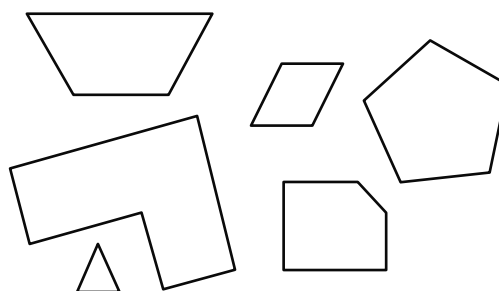

Check

Use the following shapes for Problems 1–2.

1. Put an **X** on *all* the hexagons.

2. Put an **O** on *all* the pentagons.

Drawing Shapes

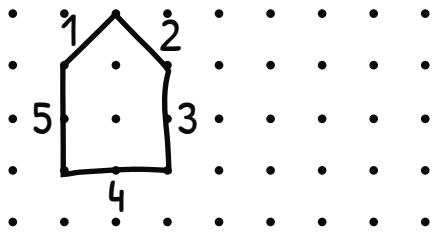

ML 6.03

Modeled Review

Name: Clare

Draw a pentagon.

I know a pentagon
has 5 sides and
5 corners.

Guided Practice

Complete the shapes.

triangle

3 sides,
3 corners

quadrilateral

4 sides,
4 corners

pentagon

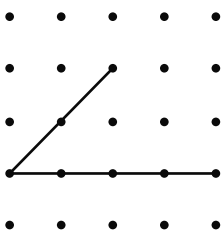

5 sides,
5 corners

hexagon

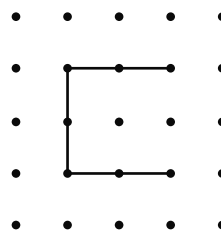

6 sides,
6 corners

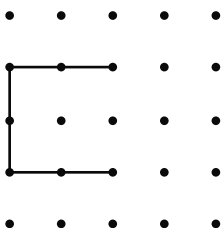

1. triangle

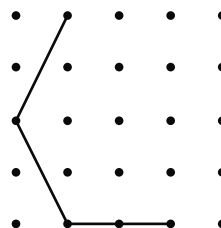

2. quadrilateral

3. pentagon

4. hexagon

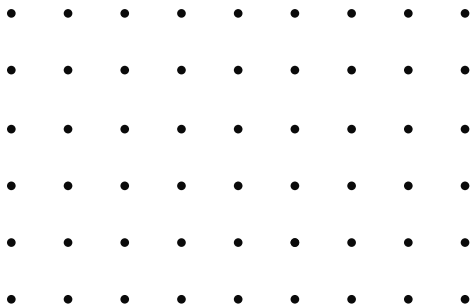

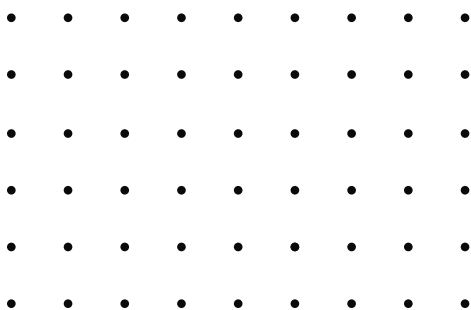

Guided Practice

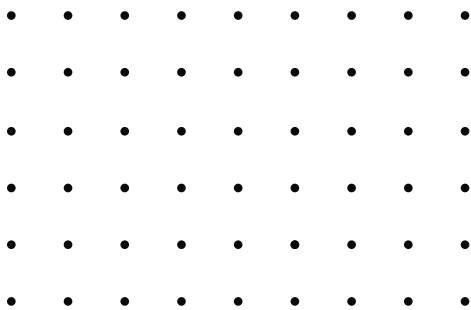

5. Draw a triangle.

6. Draw a pentagon.

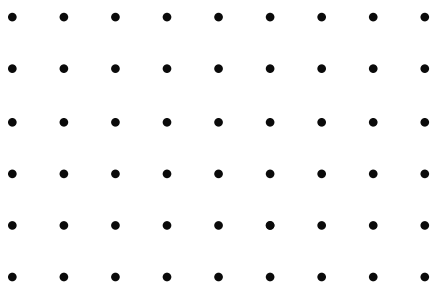

7. Draw a hexagon.

Check

Draw a quadrilateral.

Drawing Shapes by Attributes

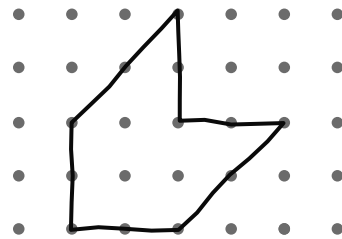

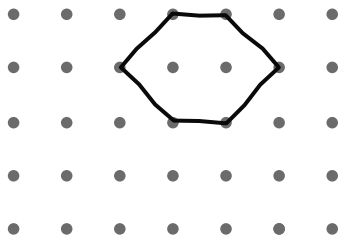

ML 6.04

Modeled Review

Name: Han

Draw *two* different hexagons.

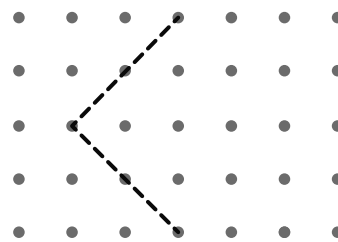

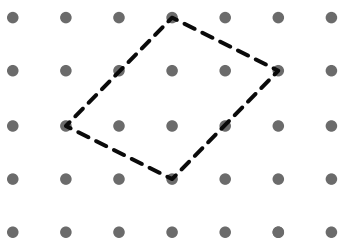

Guided Practice

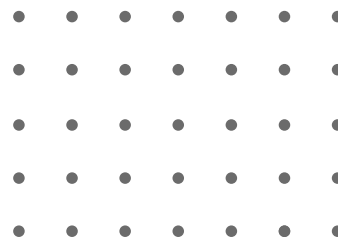

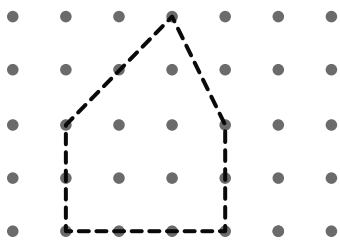

Draw *two* different versions of each shape.

1. Quadrilaterals

2. Pentagons

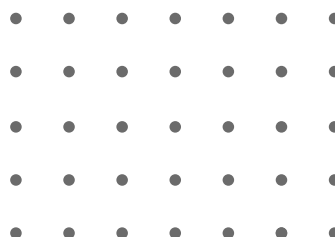

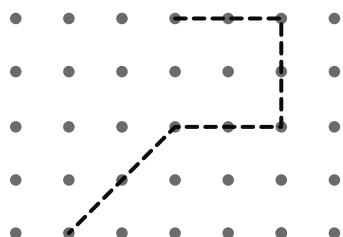

Guided Practice

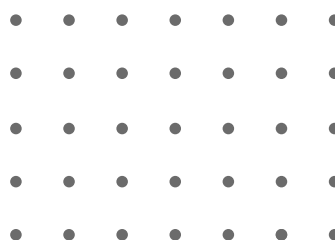

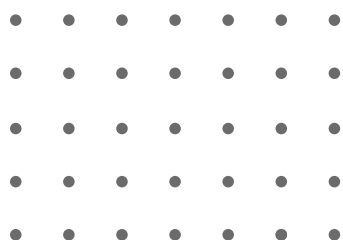

Draw *two* different versions of each shape.

3. Hexagons

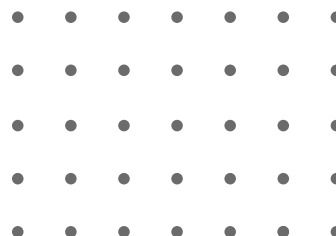

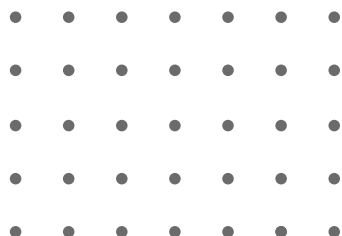

4. Quadrilaterals

Check

Draw *two* different pentagons.

Drawing Shapes by Side Length

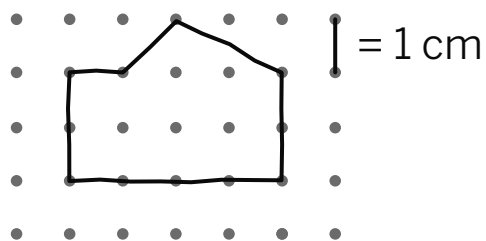

ML 6.05

Modeled Review

Name: Eva

Draw a 6 sided shape with two sides being 2 centimeters long.

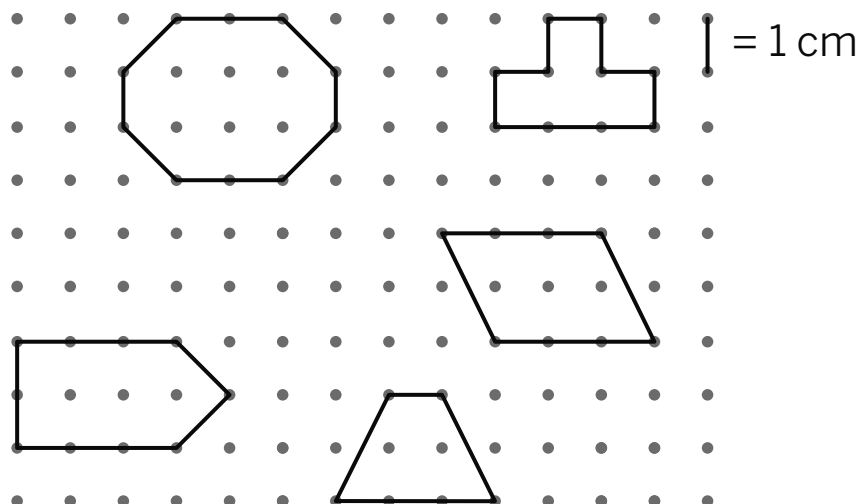

What shape did you draw? hexagon

Guided Practice

1. Diego drew a shape that had fewer than 6 sides. Two sides are 3 centimeters long. Circle *two* shapes that could be Diego's shape.

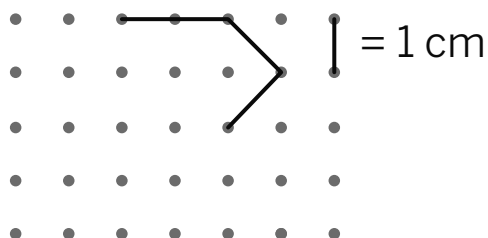

Guided Practice

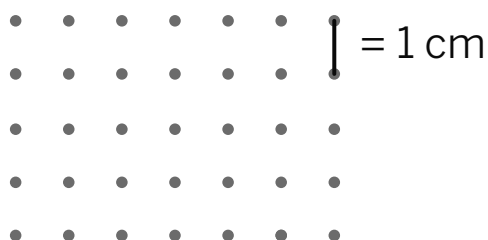

Draw each shape according to the given attributes.

2. 6 sided shape with two sides that are 2 centimeters long.

What shape did you draw? _____

3. 4 sided shape with one side that is 4 centimeters long.

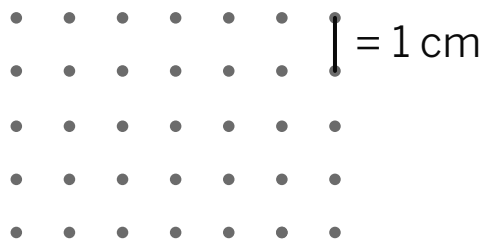

What shape did you draw? _____

Check

Draw a 5 sided shape with two sides being 3 centimeters long.

What shape did you draw? _____

Measuring Three-Dimensional Shapes

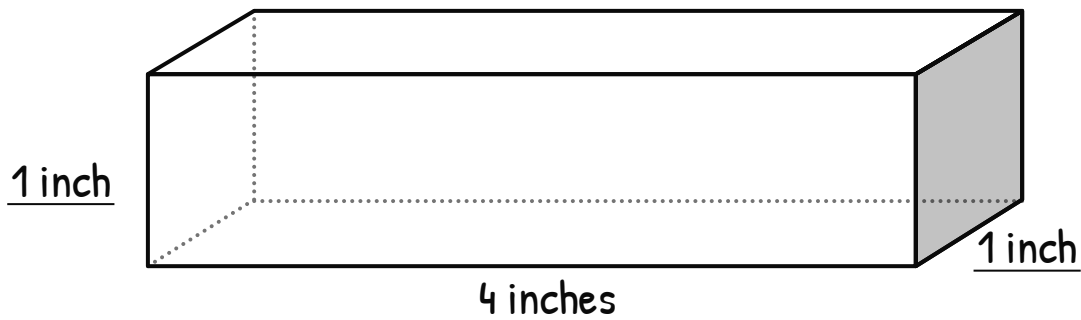

ML 6.06

Modeled Review

Name: Tristan

Use a ruler to measure the edges of the shape in inches. Fill in the blank for each edge with its measurement.

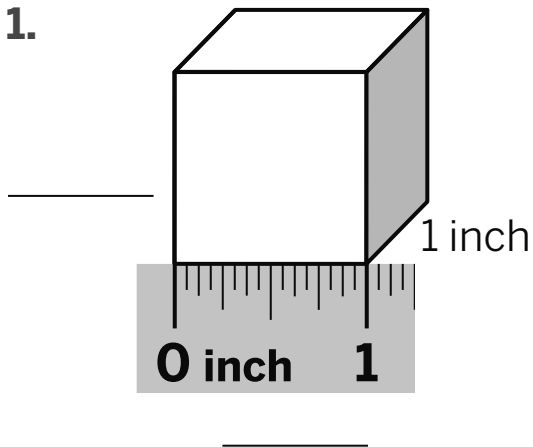

Guided Practice

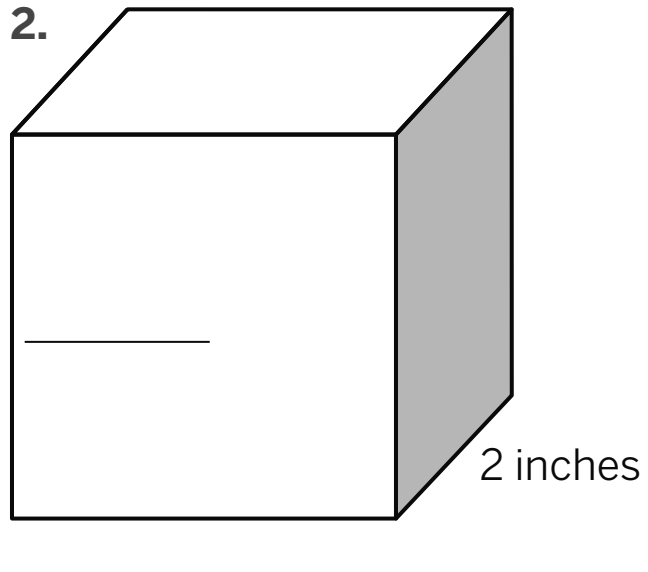

Use a ruler to find the missing measurement for each cube.

1.

2.

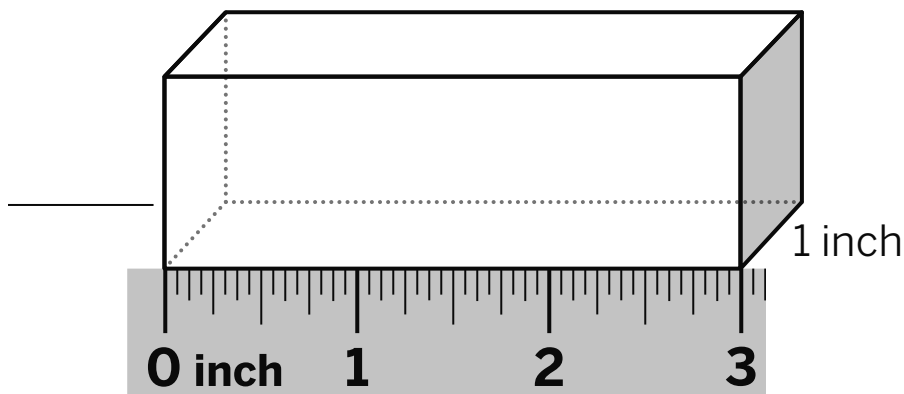

Guided Practice

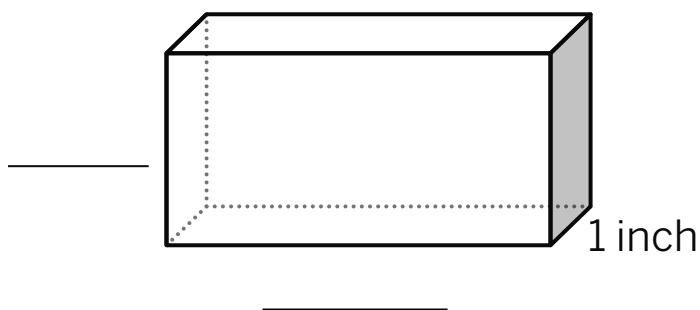

Use a ruler to find the missing measurements for each shape.

3.

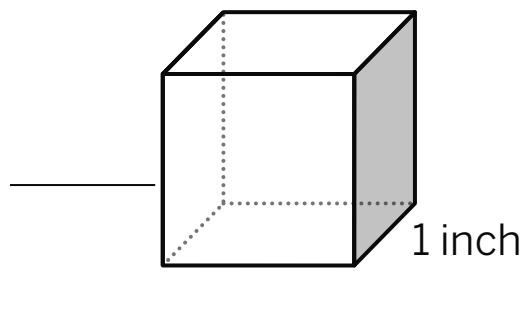

4.

Check

Use a ruler to measure the edges of the cube in inches. Fill in the blank for each edge with its measurement.

Describing Three-Dimensional Shapes

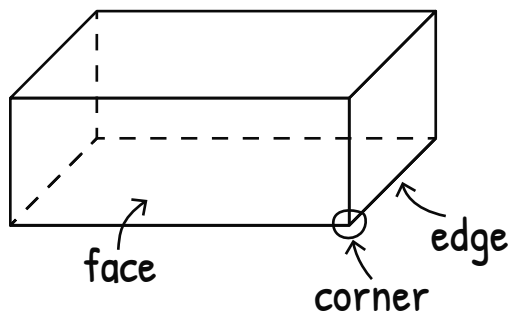

ML 6.07

Modeled Review

Name: Priya

Describe the shape.

This shape has 6 faces,
8 corners, and 12 edges.

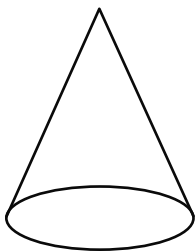

Guided Practice

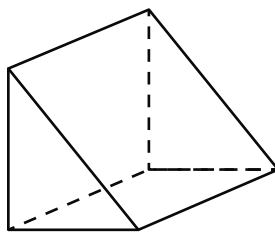

How many faces, corners, and edges does each shape have?

1.

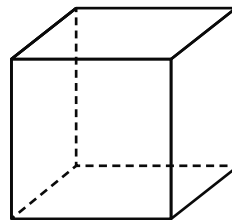

1 face
0 corners
_____ edge

2.

5 faces
_____ corners
_____ edges

3.

_____ faces
_____ corners
_____ edges

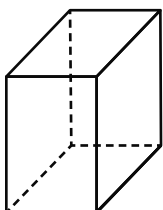

Guided Practice

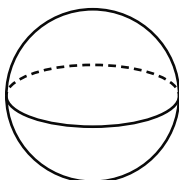

Describe the shape using the terms *face*, *edge*, and *corner*.

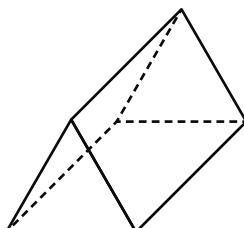

4.

5.

6.

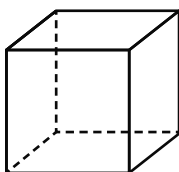

Check

Describe the shape using the terms *face*, *edge*, and *corner*.

Comparing Halves, Fourths, and Thirds

ML 6.08

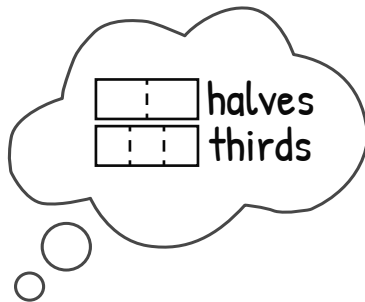

Modeled Review

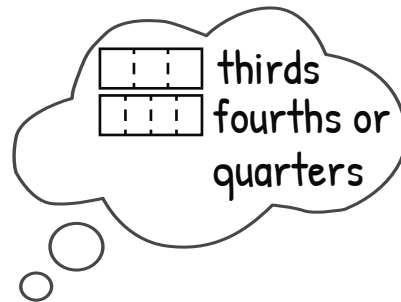

Name: Jack

Complete the sentence using *smaller than*, *larger than*, or *the same size as*.

1. A third is smaller than a half.

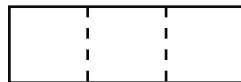

2. A third is larger than a quarter.

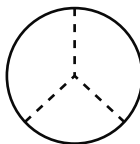

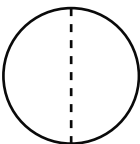

Guided Practice

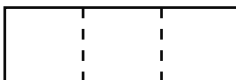

1. Circle the shape that is split into *smaller* equal parts.

2. Circle the shape that is split into *larger* equal parts.

3. Circle the shape that is split into *smaller* equal parts.

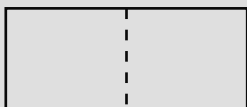

Guided Practice

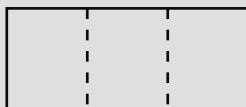

Complete each sentence using *smaller than*, *larger than*, or *the same size as*.

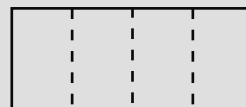

halves

thirds

fourths or quarters

4. A half is _____ a third.
5. A fourth is _____ a third.
6. A quarter is _____ a fourth.
7. A third is _____ a quarter.
8. A half is _____ a fourth.

Check

Complete each sentence using *smaller than*, *larger than*, or *the same size as*.

1. A third is _____ a fourth.
2. A quarter is _____ a half.

Splitting Shapes Into Halves, Fourths, and Thirds

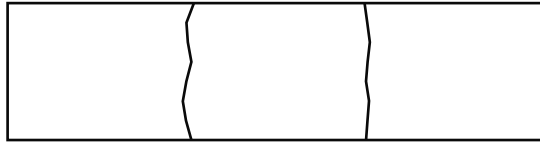

ML 6.09

Modeled Review

Name: Jada

1. Split each shape into **3** equal parts. Then write the name of the parts.

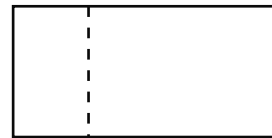

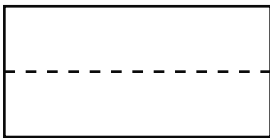

The equal parts are called thirds.

Guided Practice

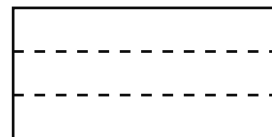

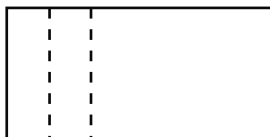

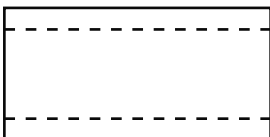

Draw an **X** on two rectangles in each row that are **not** examples.

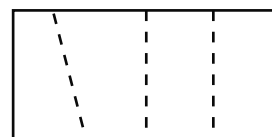

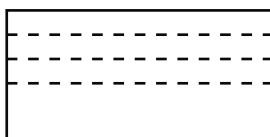

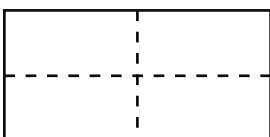

1. halves

2. thirds

3. fourths

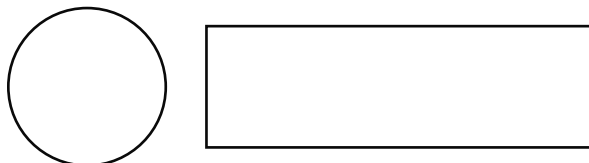

Guided Practice

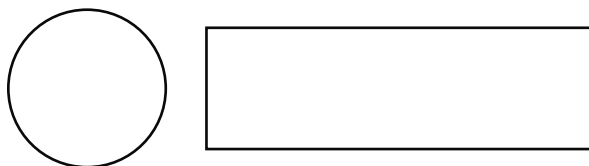

Split each shape into equal parts. Then write the name of the parts.

4. 2 equal parts

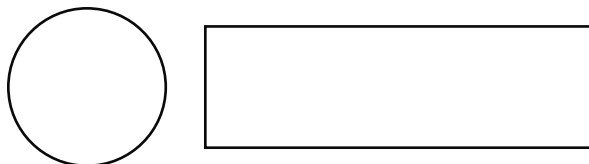

The equal parts are called _____.

5. 3 equal parts.

The equal parts are called _____.

6. 4 equal parts

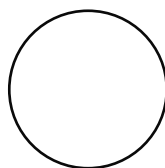

The equal parts are called _____.

Check

Split the circle into **4** equal parts. Then write the name of the parts.

The equal parts are called _____.

Creating Equal Parts in Multiple Ways

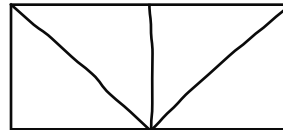

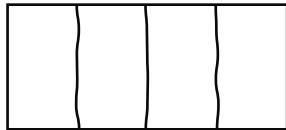

ML 6.10

Modeled Review

Name: Shawn

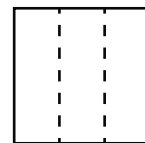

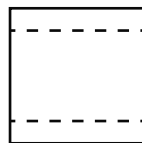

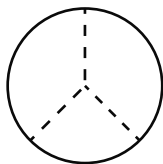

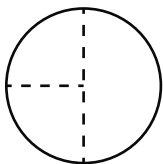

Show 2 different ways to split the rectangle into fourths.

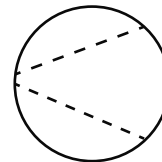

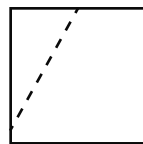

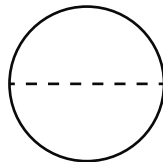

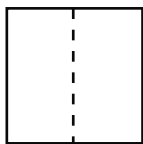

Guided Practice

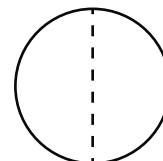

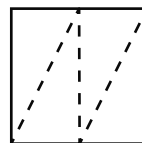

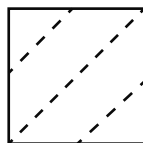

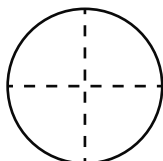

1. Circle 2 shapes that are split into thirds.

2. Circle 2 shapes that are split into halves.

3. Circle 2 shapes that are split into fourths.

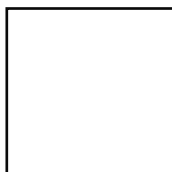

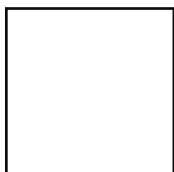

Guided Practice

Show 2 different ways to split each shape.

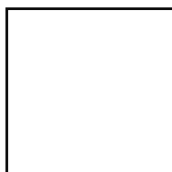

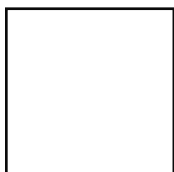

4. fourths

5. fourths

6. thirds

Check

Show 2 different ways to split the rectangle into thirds.

Naming Parts of a Whole

ML 6.11

Modeled Review

Name: Maya

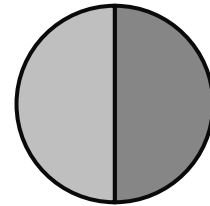

The circle is split into 2 equal parts.

1. How much of the circle is dark gray?

_____ one half

2. How much of the circle is shaded?

_____ two halves

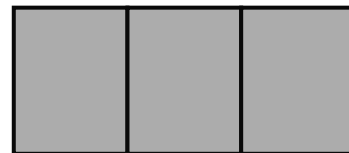

Guided Practice

1. Match each description with the correct diagram.

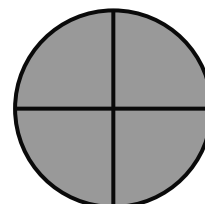

fourths

thirds

halves

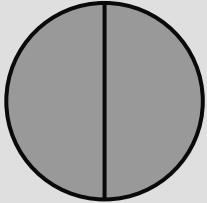

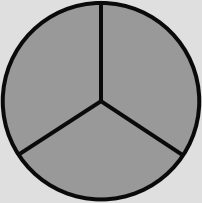

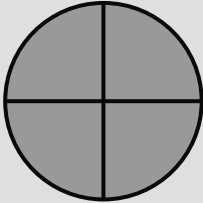

Guided Practice

2. Fill in the descriptions to match each diagram.

		
one half	one third	
halves		
2 halves = 1 whole	___ thirds = 1 whole	

Check

The rectangle is split into 4 equal parts.

1. How many parts are shaded black?

2. How many parts are shaded?

Telling Time With Halves and Quarters

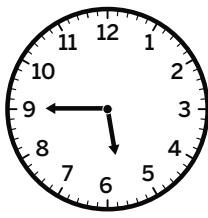

ML 6.12

Modeled Review

Name: Han

Circle the time shown on the clock.

quarter to  quarter past half past 6 quarter past 6 quarter to 6

half past

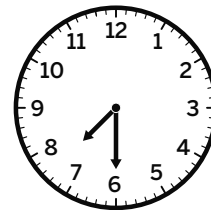

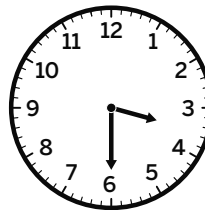

Guided Practice

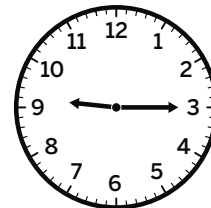

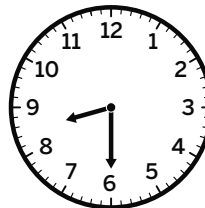

1.

Circle the clock that shows half past 3.

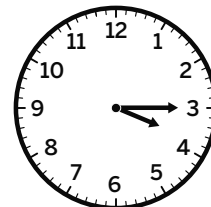

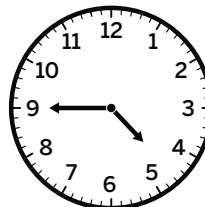

2.

Circle the clock that shows quarter past 9.

3.

Circle the clock that shows quarter to 5.

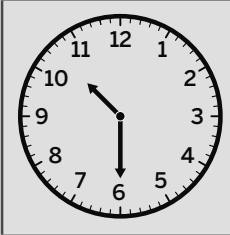

Guided Practice

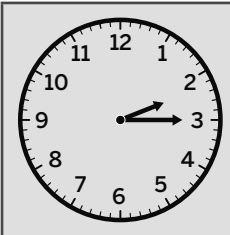

Circle the time shown on the clock.

4.

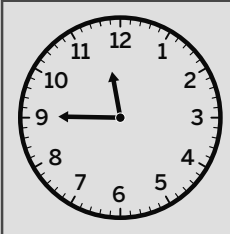

half past 10 quarter past 10 quarter to 10

5.

half past 2 quarter past 2 quarter to 2

6.

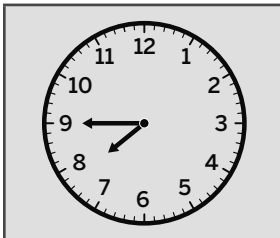

half past 12 quarter past 12 quarter to 12

Check

Circle the time shown on the clock.

half past 8 quarter past 8 quarter to 8

Telling Time by the 5-Minute

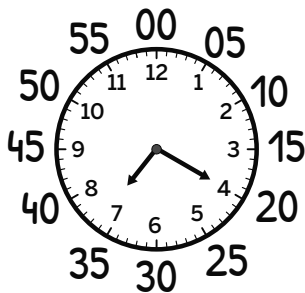

ML 6.13

Modeled Review

Name: Tristan

Write the time shown on the clock. Show how you found the time on the clock.

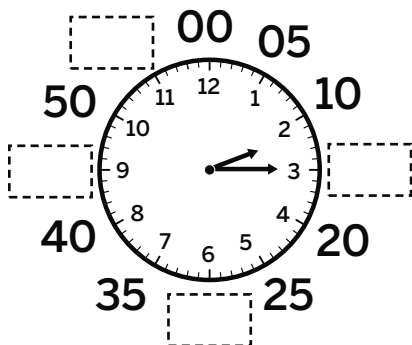

time: 7 : 20

Guided Practice

Label the missing numbers to show the time to the nearest 5 minutes. Then circle the time shown on the clock.

1.

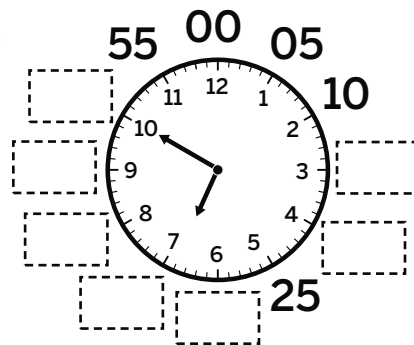

3:10

2:15

1:15

2.

7:50

10:35

6:50

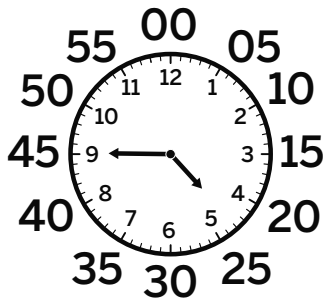

Guided Practice

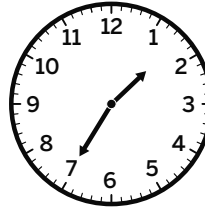

Write the time shown on the clock. Show how you found the time on the clock.

3.

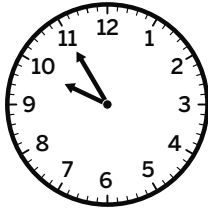

time: _____ : _____

4.

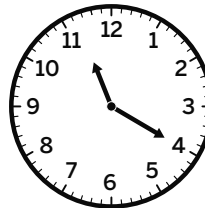

time: _____ : _____

5.

time: _____ : _____

6.

time: _____ : _____

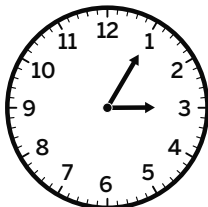

Check

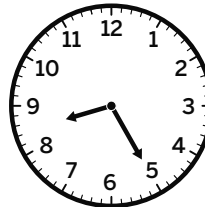

Write the time shown on the clock. Show how you found the time on the clock.

1.

time: _____ : _____

2.

time: _____ : _____

Strategies to Tell Time

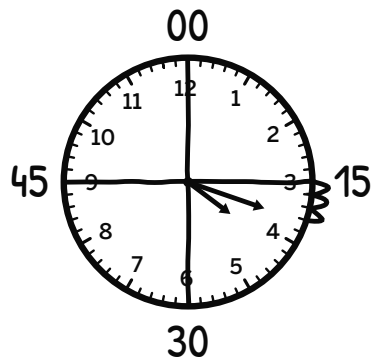

ML 6.14

$437 + 385$

answer: _____

Adding by Place Value Using Equations

ML 7.07

Modeled Review

Name: Shawn

Find the sum.

$$786 + 121 = \underline{907}$$

$$6 + 1 = 7$$

$$80 + 20 = 100$$

$$700 + 100 = 800$$

$$7 + 100 + 800 = 907$$

Name: Clare

Find the sum.

$$786 + 121 = \underline{907}$$

$$700 + 100 = 800$$

$$80 + 20 = 100$$

$$6 + 1 = 7$$

$$800 + 100 + 7 = 907$$

Guided Practice

Complete each equation to find the sum

1. $32 + 64$

Add ones: $2 + 4 = 6$

Add tens: $30 + 60 = 90$

$$6 + 90 = \underline{\quad}$$

answer: _____

2. $145 + 132$

Add hundreds: $100 + 100 = \underline{\quad}$

Add tens: $40 + \underline{\quad} = \underline{\quad}$

Add ones: $5 + \underline{\quad} = \underline{\quad}$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

answer: _____

Guided Practice

Find the sum. Show your thinking.

3. $142 + 325$

$$100 + \underline{\quad} = \underline{\quad}$$

$$40 + \underline{\quad} = \underline{\quad}$$

$$2 + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

answer: $\underline{\hspace{2cm}}$

4. $223 + 318$

$$3 + 8 = 11$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

answer: $\underline{\hspace{2cm}}$

5. $476 + 241$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

answer: $\underline{\hspace{2cm}}$

6. $485 + 167$

answer: $\underline{\hspace{2cm}}$

Check

Find the sum. Show your thinking.

even

odd

Check

1. Count by 2.

10, _____, _____, _____

2. Is the last number you counted even or odd? _____

Identifying and Describing Arrays

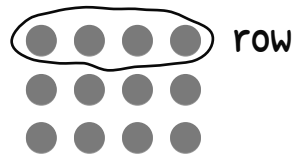

ML 8.08

Modeled Review

Name: Eva

Use the array for Problems 1–3.

1. There are 3 rows in the array.
2. There are 4 counters in each row.
3. There are 12 counters in total.

Guided Practice

1. Use each array to fill in the missing numbers.

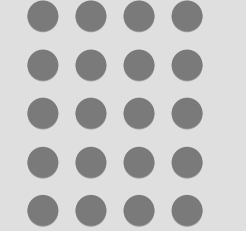

Array	Number of rows	Counters in each row	Total counters
	3	2	
		4	

Guided Practice

2. Use each array to fill in the missing numbers.

Array	Number of rows	Counters in each row	Total counters
			
			
			

For Problems 3–5, use the array to fill in the blanks.

3. There are _____ rows in the array.

4. There are _____ counters in each row.

5. There are _____ counters in total.

Check

For Problems 1–3, use the array to fill in the blanks.

1. There are _____ rows in the array.

2. There are _____ counters in each row.

3. There are _____ counters in total.

Creating Arrays

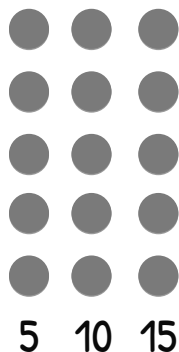

ML 8.09

Modeled Review

Name: Clare

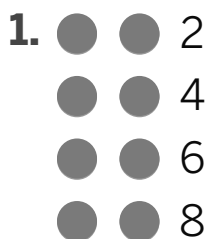

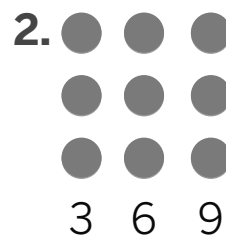

Find the total amount in the array.

total: 15

Guided Practice

Find the total amount in each array.

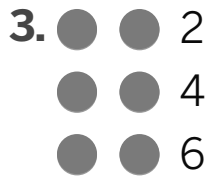

4 rows in each rowtotal: 3 columns in each columntotal:

Representing Arrays With Equations

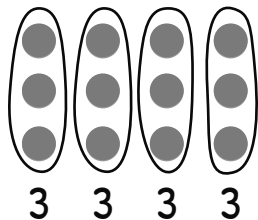

ML 8.10

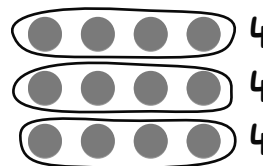

Modeled Review

Name: Eva

Write an equation that represents the total number of counters in the array.

equation: $3 + 3 + 3 + 3 = 12$ Name: Avery

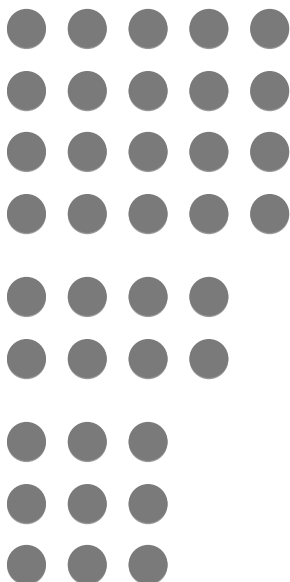

Write an equation that represents the total number of counters in the array.

equation: $4 + 4 + 4 = 12$ 

Guided Practice

1. Draw a line from the array to its matching equation.

$$3 + 3 + 3 = 9$$

$$5 + 5 + 5 + 5 = 20$$

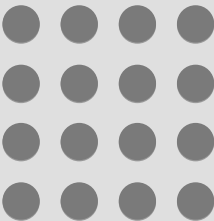

$$2 + 2 + 2 + 2 = 8$$

Guided Practice

2. Write an equation that represents each array.

Array	Equation
	$2 + 2 + 2 + 2 + 2 = \underline{\quad}$
	$4 + 4 + \underline{\quad} + \underline{\quad} = \underline{\quad}$
	

Check

Write an equation that represents the array.

equation: _____

Writing Equations to Match Arrays

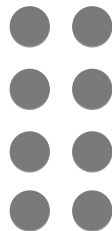

ML 8.11

Modeled Review

Name: Eva

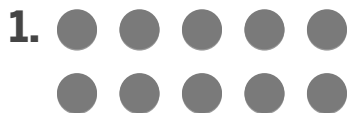

Write *two* equations that represent the array.

equation 1: $2 + 2 + 2 + 2 = 8$ equation 2: $4 + 4 = 8$ 

Guided Practice

Circle *all* expressions that represent the array.

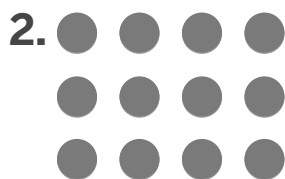

$5 + 5 + 5 + 5 + 5$

$5 + 5$

$2 + 2 + 2 + 2 + 2$

$2 + 2$

$3 + 3 + 3 + 3$

$3 + 3 + 3$

$4 + 4 + 4 + 4$

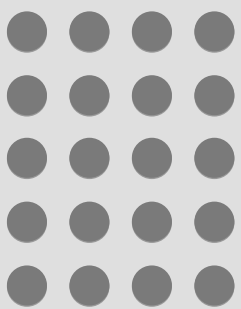

$4 + 4 + 4$

Guided Practice

3. Write *two* equations that represent each array.

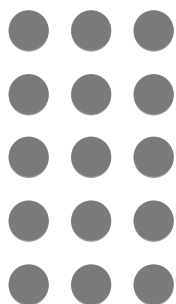

Array	Equation 1	Equation 2
	$4 + 4 + 4 + 4 + 4 = 20$	$5 + 5 + 5 + 5 = \underline{\quad}$
	$2 + 2 + 2 = 6$	
	$3 + 3 + 3 + 3 = \underline{\quad}$	
		

Check

Write *two* equations that represent the array.

equation 1: _____

equation 2: _____

Making Rectangular Arrays With Equal-Sized Squares

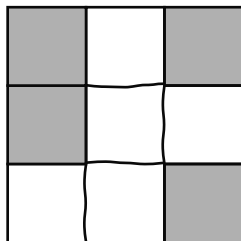

ML 8.12

Modeled Review

Name: Dylan

Draw lines so that the rectangle has equal rows and equal columns. Find the number of rows and the number of columns.

rows: 3columns: 3

Guided Practice

1. Use square tiles to cover the rectangle. Then write the number of rows and columns.

rows: _____

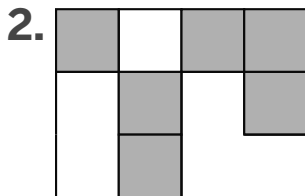

columns: _____

Guided Practice

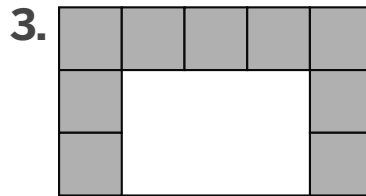

Draw lines so that each rectangle has equal rows and equal columns. Find the number of rows and the number of columns.

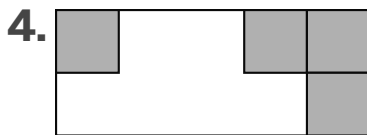

rows: _____

columns: _____

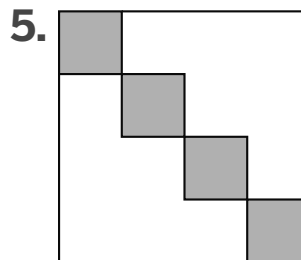

rows: _____

columns: _____

rows: _____

columns: _____

rows: _____

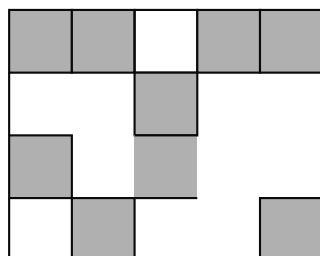

columns: _____

Check

Draw lines so that the rectangle has equal rows and equal columns. Find the number of rows and the number of columns.

rows: _____

columns: _____

Splitting Rectangles Into Equal-Sized Squares

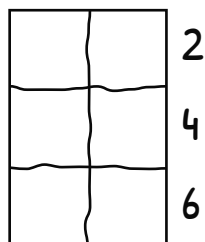

ML 8.13

Modeled Review

Name: Shawn

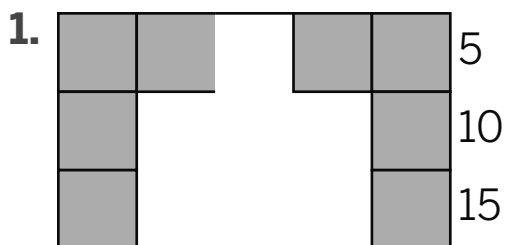

Split the rectangle into 3 rows and 2 columns of equal-sized squares. Then find the total number of squares.

total: 6

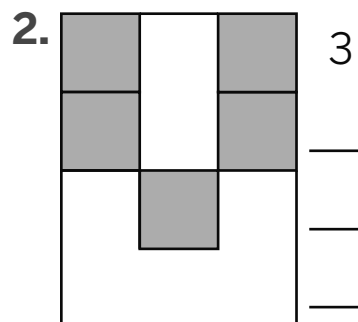

Guided Practice

Draw lines so that each rectangle has equal rows and equal columns. Skip count to find the total number of squares.

total: _____

total: _____

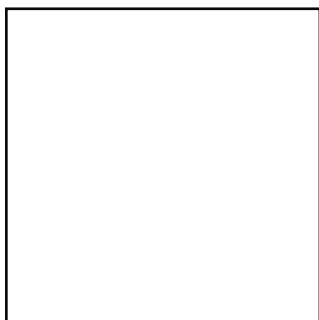

Guided Practice

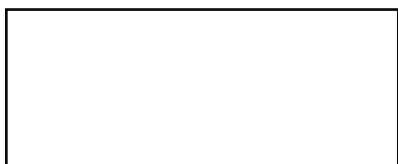

Split each rectangle into equal-sized squares. Then find the total number of squares.

3. 4 rows and 4 columns

total: _____

4. 2 rows and 5 columns

total: _____

5. 3 rows and 3 columns

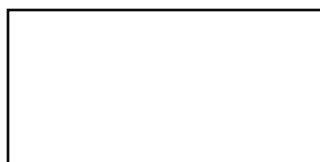

total: _____

Check

Split the rectangle into 2 rows and 4 columns of equal-sized squares. Then find the total number of squares.

total: _____

Prerequisite Skills and Concepts

Mini-Lessons

Creating and Interpreting Data Representations

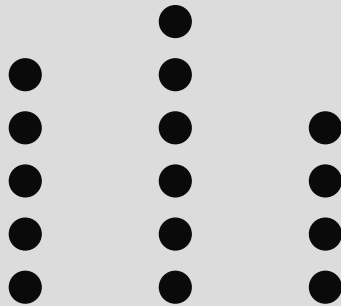

ML 1.04

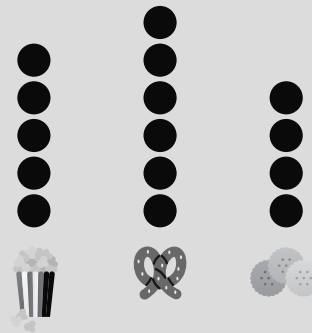

Modeled Review

Students voted on their favorite snack. The votes are shown in two ways.

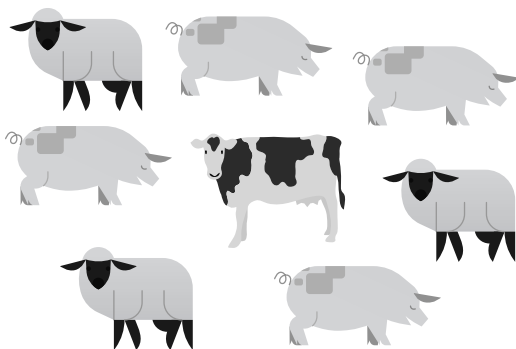

Our Favorite Snacks

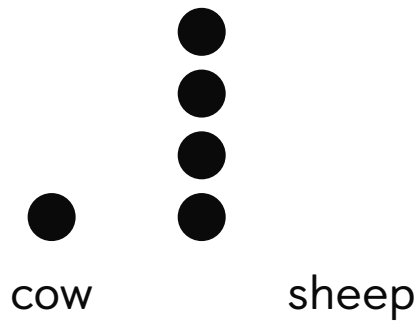

Guided Practice

- Students voted on their favorite farm animal. Write the missing label and draw dots to show the missing number of sheep.

Favorite Farm Animal

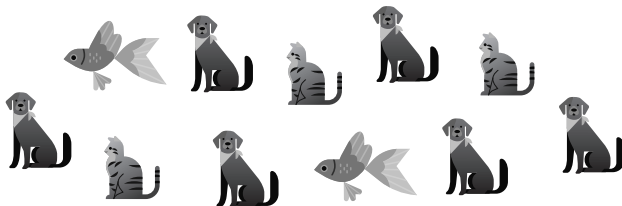

Guided Practice

2. Students voted on their favorite pet. Write the missing labels and draw dots to show the missing data.

●

●

●

●

●

dog _____

Check

Students voted on their favorite sport. Create a data representation to show the data.

Determining if Addition Equations are True

ML 1.09

Modeled Review

Name: Han

Circle to show if the equation is *true* or *false*.

$$9 + 6 = 1$$

6 and 1 more is 7. 7 is not equal to 9, so the equation is false.

Name: Jada

Circle to show if the equation is *true* or *false*.

$$3 + 1 = 2 + 2$$

3 and 1 more is 4. 2 and 2 more is 4. 4 and 4 are the same, so the equation is true.

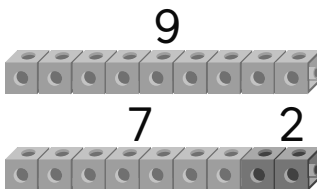

Guided Practice

Circle to show if each equation is *true* or *false*.

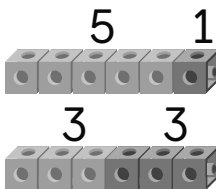

1.

$$9 = 7 + 2$$

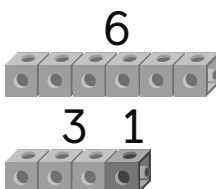

2.

$$5 + 1 = 3 + 3$$

3.

$$6 = 3 + 1$$

Guided Practice

Circle to show if each equation is *true* or *false*.

4. $4 + 4 = 2 + 5$

5. $8 = 3 + 4$

6. $3 + 7 = 5 + 5$

7. $10 = 9 + 1$

Check

Circle to show if each equation is *true* or *false*.

1. $3 + 2 = 5 + 1$

2. $7 = 4 + 3$

Representing and Solving Subtraction Story Problems

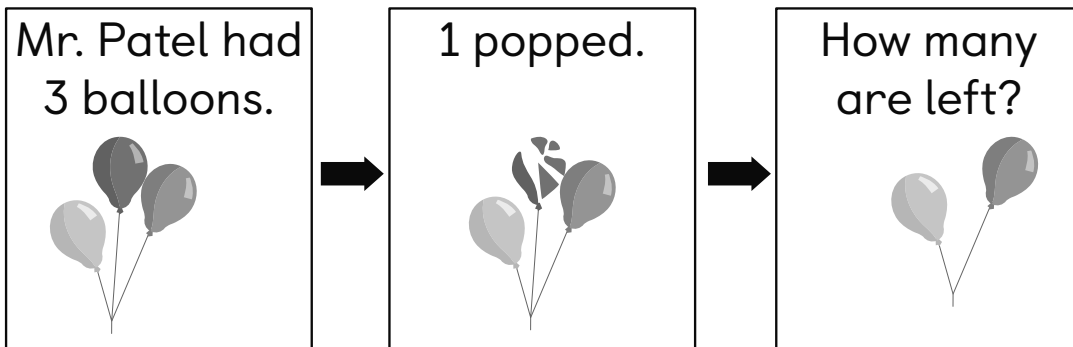

ML 1.10

Modeled Review

Name: Shawn

Use the story to complete the problem.

expression: 3 - 1difference: 2

Guided Practice

Use the story to solve each problem. If it is helpful, use cubes to act out the story problems.

1. Diego had 4 bananas. He ate 2. How many bananas are left?

_____ bananas

2. Clare had 5 apples. She ate 1. How many apples are left?

Guided Practice

Write an expression to match each story. Then solve to find the difference. If it is helpful, use cubes to act out the story problems.

3. Jack had 6 toy cars. He gave 3 to his friends. How many toy cars does Shawn have left?

expression: 6 - 3 difference: _____

4. Priya wants to read 9 books. She has read 5. How many books does she still have to read?

expression: _____ difference: _____

5. Ms. Hernandez had 8 pencils. She gave 2 to Han. How many pencils does she have left?

expression: _____ difference: _____

Check

Write an expression to match the story. Then solve to find the difference.

There were 10 fish. 3 swam away. How many fish did not swim away?

expression: _____ difference: _____

Interpreting Data Represented With Tally Marks

ML 1.13.A

Modeled Review

Name: Dylan

Students voted on their favorite instrument.
Complete the table using the tally chart.

Votes for Favorite Instrument

drums	piano	guitar

Instrument	Total votes
drums	5
piano	2
guitar	3

Guided Practice

- Students voted on their favorite sport. Complete the table using the tally chart.

Votes for Favorite Sport

soccer	football	basketball

Sport	Total votes
soccer	4
football	
basketball	

Guided Practice

2. Students voted on their favorite animal. Complete the table using the tally chart.

Votes for Favorite Animal

dog	cat	fish

Animal	Total votes
dog	
cat	
fish	

Use the data from Problem 2. Circle to show if each statement is *true* or *false*.

3. More students voted for cats than dogs.  

4. Fewer students voted for fish than cats.  

Check

1. Students voted on their favorite subject. Complete the table using the tally chart.

Votes for Favorite Subject

reading	math	science

Subject	Total votes
reading	
math	
science	

Use the data from problem 1. Circle to show if each statement is *true* or *false*.

2. There are 7 votes for math.  

3. More students voted for reading than science.  

Selecting Which Questions Can Be Answered Using Data

ML 1.15

Modeled Review

Can the question be answered using the data in the tally chart?

Insects Priya Saw

ant	ladybug	butterfly

No, because it shows the number of insects, not favorite insects.

What is Priya's favorite insect?  

Guided Practice

Han made a tally chart for the rides he went on at the fair.

Rides Han Went on at the Fair

bumper car	carousel

Circle to show if each question can be answered using the data.

1. How many times did Han ride the carousel?

2. Did Han have fun at the fair?

Guided Practice

Clare made a tally chart to show the number of animals she saw on the farm.

Animals Clare Saw on the Farm

cow	goat	pig

Circle to show if each question can be answered using the data. If the question can be answered, write the answer on the line.

3. Which animal did Clare like the best?

4. How many cows and pigs did Clare see?

Check

Diego made a tally chart to show the number of vehicles he saw.

Vehicles Diego Saw

car	truck	bus

Circle to show if the question can be answered using the data.

1. How many trucks and buses did Diego see?

2. How fast did the trucks drive?

Representing and Solving Story Problems With Equations

ML 2.03

Modeled Review

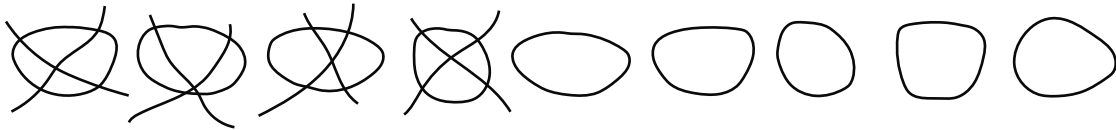

Name: Maya

Write an equation to show how you solved the story problem.

There were 9 kids in the library.

4 of them went back to class.

How many kids are in the library now?

equation: $9 - 4 = 5$

Guided Practice

Write an equation to show how you solved the story problem.

1. There were 6 books on a cart.

Someone put 2 more books on the cart.

How many books are on the cart now?

equation: $6 + \underline{\quad} = \underline{\quad}$

Guided Practice

Write an equation to show how you solved the story problem.

2. There were 5 books on the shelf.
The students took 3 books off the shelf.
How many books are on the shelf now?

equation: _____

3. Santiago read 4 pages.
He reads 4 more pages.
How many pages did Santiago read altogether?

equation: _____

Check

Write an equation to show how you solved the story problem.

- There were 7 books on the table.
The students took 5 of the books off the table.
How many books are on the table now?

equation: _____

Identifying Unknowns in Story Problems

ML 2.06

Modeled Review

Name: Kai

Match each story problem with the equation that represents it.

1. There were 2 starfish.

They found some more.

Now there are 8 starfish.

How many starfish did they find?

$$8 - 2 = \underline{\quad}$$

2. There were 8 starfish.

2 of them went back in the ocean.

How many starfish are there now?

$$2 + \underline{\quad} = 8$$

Guided Practice

Match the story problem with the equation that represents it.

1. Avery had 6 shells.

She lost 4 of them.

How many does she have now?

$$4 + \underline{\quad} = 10$$

2. Avery had 4 shells.

She found some more.

Now she has 10 shells.

How many shells did she find?

$$6 - 4 = \underline{\quad}$$

Guided Practice

Write an equation to show how you solved the story problem.

3. There were 3 people at the beach.
Some more people came to the beach.
Now there are 6 people at the beach.
How many people came to the beach?

equation: _____

4. There were 7 people swimming in the water.
2 people got out of the water.
How many people are in the water now?

equation: _____

Check

Write an equation to show how you solved the story problem.

- Dylan built 2 sand castles.
His dad built some more sand castles.
Now there are 5 sand castles.
How many sand castles did Dylan's dad build?

equation: _____

Solving Problems By Adding in Any Order**ML 2.07****Modeled Review**

Two students solved the story problem.

There are 4 red birds and 5 blue birds.

How many birds are there in total?

Clare's work

Dylan's work

(r)(r)(r)(r)(b)(b)(b)(b)(b) (b)(b)(b)(b)(b)(r)(r)(r)(r)

equation: $4 + 5 = 9$

equation: $5 + 4 = 9$

**Guided Practice**

Circle *two* equations that represent the problem.

1. Han has 3 dogs and Eva has 4 cats.

How many pets do they have altogether?

(d)(d)(d)(c)(c)(c)(c)

$$3 + 4 = 7$$

$$3 + 3 = 6$$

$$2 + 5 = 7$$

$$4 + 3 = 7$$

Guided Practice

Solve the story problem and write an equation.

2. There are 5 kittens and 3 puppies in a pet store.
How many kittens and puppies are in the store?

equation: $\underline{\quad} + \underline{\quad} = \underline{\quad}$

3. There are 2 squirrels and 4 birds in a tree.
How many squirrels and birds are in the tree?

equation: $\underline{\hspace{2cm}}$

4. There are 7 rabbits and 2 squirrels in the yard.
How many rabbits and squirrels are in the yard?

equation: $\underline{\hspace{2cm}}$

Check

Solve the story problem and write an equation.

Priya has a tank with 3 red fish and 6 blue fish.
How many red and blue fish are in the tank?

equation: $\underline{\hspace{2cm}}$

Representing and Solving Story Problems

ML 2.13

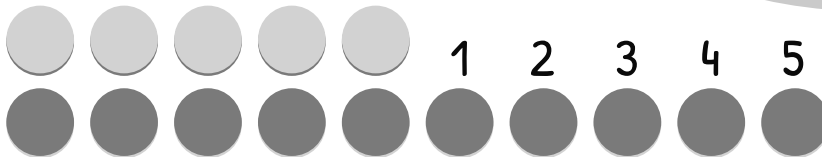

Modeled Review

Name: Kai

Solve the story problem.

There are 5 desks and 10 chairs. How many *more* chairs are there than desks?

There are 5 more chairs than desks.

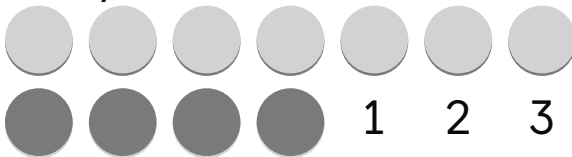

Guided Practice

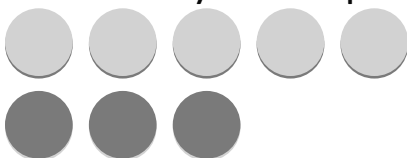

Solve each story problem.

1. There are 7 paint colors and 4 paint brushes. How many *fewer* brushes are there than paint colors?

_____ fewer paint brushes

2. There are 5 pencils on the table. There are 3 students. How many *more* pencils are there than students?

_____ more pencils

Guided Practice

Use two-color counters to solve the story problems.

3. There are 3 markers and 5 crayons.
How many *fewer* markers are there than crayons?

answer: _____

4. There are 9 erasers and 5 pencils.
How many *more* erasers are there than pencils?

answer: _____

Check

Use two-color counters to solve the story problem.

There are 5 pieces of paper and 8 students. How many *more* students are there than pieces of paper?

answer: _____

Using Patterns to Find Sums Within 10

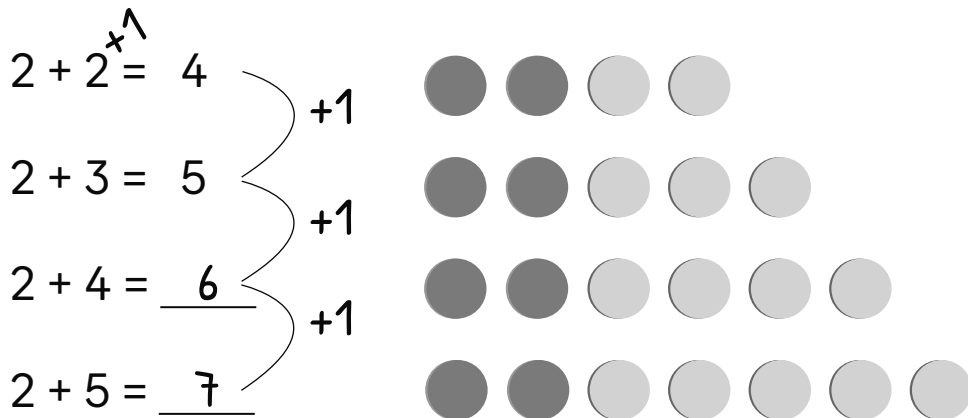

ML 3.02

Modeled Review

Name: Han

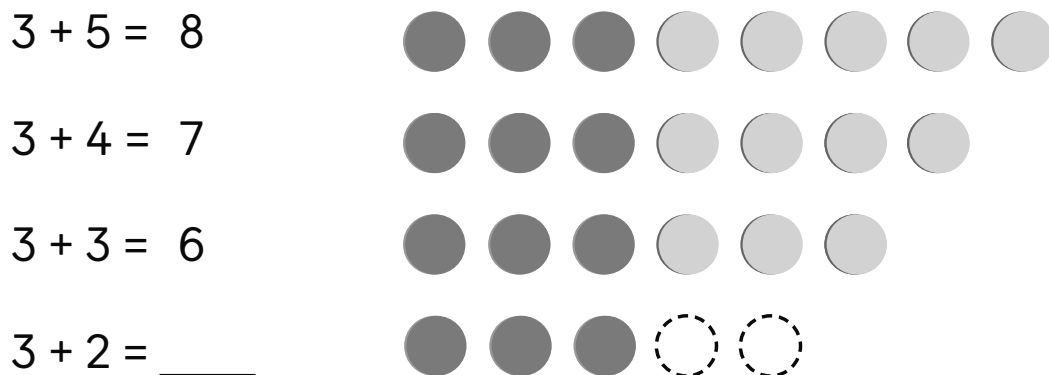

Use the pattern in the equations to find the sum without adding.

Guided Practice

1. Use the pattern in the equations to find the sum without adding.

Guided Practice

Use the pattern in the equations to find the sum without adding.

$$2. 5 + 5 = 10$$

$$3. 6 + 1 = 7$$

$$5 + 4 = 9$$

$$6 + 2 = 8$$

$$5 + 3 = \underline{\quad}$$

$$6 + 3 = \underline{\quad}$$

$$5 + 2 = \underline{\quad}$$

$$6 + 4 = \underline{\quad}$$

$$4. 2 + 7 = 9$$

$$5. 1 + 3 = 4$$

$$2 + 6 = 8$$

$$1 + 4 = 5$$

$$2 + 5 = \underline{\quad}$$

$$1 + 5 = \underline{\quad}$$

$$2 + 4 = \underline{\quad}$$

$$1 + 6 = \underline{\quad}$$

Check

Use the pattern in the equations to find the sum without adding.

$$4 + 2 = 6$$

$$4 + 3 = 7$$

$$4 + 4 = \underline{\quad}$$

$$4 + 5 = \underline{\quad}$$

Using Patterns to Find Differences Within 10

ML 3.03

Modeled Review

Name: Eva

Use the pattern in the equations to find each difference without subtracting.

$9 - 2 = 7$	}	-1										
$\quad \quad +1$												
$9 - 3 = 6$		-1										
$9 - 4 = 5$		-1										
$9 - 5 = 4$												

Guided Practice

1. Use the pattern in the equations to find each difference without subtracting.

$6 - 5 = 1$						
$6 - 4 = 2$						
$6 - 3 = 3$						
$6 - 2 = \underline{\quad}$						

Guided Practice

Use the pattern in the equations to find each difference without subtracting.

2. $10 - 9 = 1$

3. $5 - 1 = 4$

$10 - 8 = 2$

$5 - 2 = 3$

$10 - 7 = \underline{\hspace{2cm}}$

$5 - 3 = \underline{\hspace{2cm}}$

$10 - 6 = \underline{\hspace{2cm}}$

$5 - 4 = \underline{\hspace{2cm}}$

4. $8 - 6 = 2$

5. $10 - 1 = 9$

$8 - 5 = 3$

$10 - 2 = 8$

$8 - 4 = \underline{\hspace{2cm}}$

$10 - 3 = \underline{\hspace{2cm}}$

$8 - 3 = \underline{\hspace{2cm}}$

$10 - 4 = \underline{\hspace{2cm}}$

Check

Use the pattern in the equations to find each difference without subtracting.

$7 - 2 = 5$

$7 - 3 = 4$

$7 - 4 = \underline{\hspace{2cm}}$

$7 - 5 = \underline{\hspace{2cm}}$

Representing Teen Numbers as a Ten and Some Ones

ML 3.05

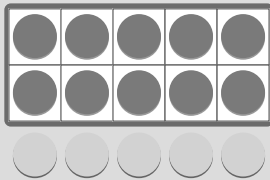

Modeled Review

Two students used counters to represent the number 15 as a ten and some ones.

Jack's work

Clare's work

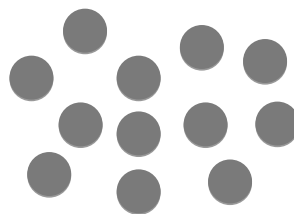

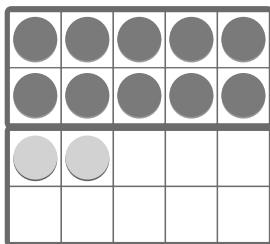

Guided Practice

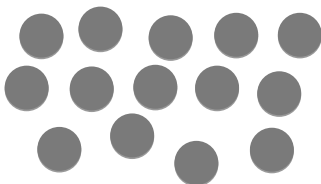

Circle the representation that shows the number as a ten and some ones.

1. 12

2. 14

Guided Practice

Use counters to represent the teen number as a ten and some ones.

3. 19

4. 13

5. 18

Check

Use counters to represent the number 16 as a ten and some ones.

Using Known Facts to Find Unknown Sums Within 20

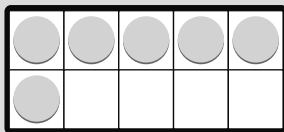

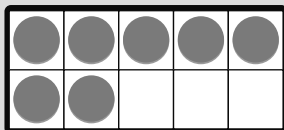

ML 3.14

Modeled Review

Diego, Avery, and Priya are finding the value of $7 + 6$.

Diego

$$7 + 3 + 3$$

Avery

$$6 + 6 + 1$$

Priya

$$7 + 7 - 1$$

Guided Practice

Circle all the expressions that match the value of the given expression.

1. $8 + 5$

$$8 + 2 + 3$$

$$3 + 5 + 5$$

$$8 + 8 + 3$$

2. $7 + 4$

$$3 + 4 + 4$$

$$7 + 7 + 4$$

$$7 + 3 + 1$$

Guided Practice

Find the sum. Use a known sum if it is helpful.

3. $9 + 7 = \underline{\quad}$

4. $7 + 8 = \underline{\quad}$

first step: $9 + 1 = 10$

first step: $7 + 7 = 14$

next step: $10 + \underline{\quad} = \underline{\quad}$

next step: $\underline{\quad}$

5. $5 + 9 = \underline{\quad}$

6. $6 + 5 = \underline{\quad}$

Check

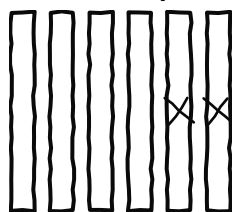

Find the sum. Use a known sum if it is helpful.

1. $8 + 6 = \underline{\quad}$

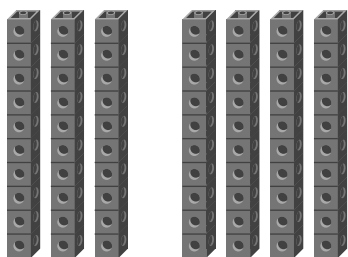

2. $5 + 7 = \underline{\quad}$

Adding and Subtracting Multiples of 10**ML 4.05****Modeled Review**Name: Jack**Solve the problem using any strategy.**

There are 6 towers of ten cubes. Han takes away 20 cubes. How many cubes are left?

 $6 \text{ tens} = 60 \text{ cubes}$ answer: 40 cubes**Guided Practice****Solve each problem using any strategy.**

1. There are 3 towers of 10 cubes. Jada added 4 towers of 10 cubes. How many total cubes are there?

answer: _____ cubes

2. There are 5 towers of 10 cubes. 20 cubes are removed. How many cubes are left?

answer: _____ cubes

Guided Practice

Solve each problem using any strategy. Use cubes if it is helpful.

3. There are 6 towers of 10 cubes. Priya added 20 cubes. How many cubes are there?

answer: _____ cubes

4. There are 4 towers of ten cubes. 10 cubes are removed. How many cubes are left?

answer: _____ cubes

Check

Solve the problem using any strategy. Use cubes if it is helpful.

There are 7 towers of 10 cubes. Han removes 30 cubes. How many cubes are left?

answer: _____ cubes

Check

Find the sum. Count on by 10s and then by 1s if it is helpful.

$42 + 37 =$ _____

Finding Sums Using Equations

ML 5.04

Modeled Review

Name: Avery

Find the sum. Use equations to show your thinking.

$$42 + 36 = \underline{78}$$

$$40 + 30 = 70$$

$$2 + 6 = 8$$

$$70 + 8 = 78$$

Guided Practice

1. Find the sum. Use equations to show your thinking.

Equations	Place Value
54 + 32 =	5 tens + 3 tens = _____ tens 4 ones + 2 ones = _____ ones _____ tens + _____ ones = _____
26 + 43 =	2 tens + 4 tens = _____ tens _____ ones + 3 ones = _____ ones _____ tens + _____ ones = _____
73 + 24 =	70 + 20 = _____ 3 + 4 = _____ _____ + _____ = _____

Guided Practice

Find the sum. Use equations to show your thinking.

$$2.76 + 13 = \underline{\hspace{2cm}}$$

3. $41 + 37 =$ _____

$$4.56 + 43 =$$

$$5.63 + 24 =$$

Check

Find the sum. Use equations to show your thinking.

$34 + 52 =$

Adding 2 Two-Digit Numbers by Making a Ten
